

## Sugar & Gur Domestic & International Fundamentals

- Steady sentiments recorded in key sugar spot markets on Saturday due to dull trading activities.
- Thailand millers expect bumper production for 2013-14 to 11 million tons.
- Various trade houses sees present ICE raw sugar future prices made a bottom level which clearly shows a bullish view on sugar. We also expect prices of sugar would increase from here owing to increasing ethanol production diverted from sugar by Brazilian millers.
- Indian millers are not ready to sell sugar below \$480 per ton, according to trade sources. It is notable that depreciating rupee and increasing sugar demand due to Ramadan give Indian exporters some window to export sugar.
- Sugar prices made its bottom due to increasing raw sugar import from Brazil. Reported, around 2 million tons of sugar has been imported (mainly by Renuka Sugars) by India from Brazil. However, recent hike in sugar import duty from 10 to 15 percent by government remove the import parity. In addition to it, weak rupee increase the sugar export parity for Indian refiners and they export refined sugar to Middle east countries.
- Sugar production in Thailand may climb by 10% to a record 11 million tonnes in 2013/14 (November to October) as yields increase, according to the Thai Sugar Millers Corp.

### Outlook:

We expect sugar prices would improve in the coming months considering increase in sugar export and upcoming sugar festive demand. Also, lower sugar production estimate for 2013-14 also support the prices in the long run.
