

Daily Sugar & Gur Fundamental Report 03rd September, 2013

Sugar & Gur Domestic & International Fundamentals

- Steady sentiments recorded in key sugar spot markets on Monday as markets could not find adequate cues to decide the prices either side.
- Sugar production in India is expected to decline by 10.8% to 24.8 million tonnes (MT) in the current sugar marketing season, which will end next month.
- Around 2 lakh tons export deals has been reported from India thanks to weak rupee against dollar.
- In contrary to the domestic market, sugar prices in International arena move downwards considering higher sugar supplies from Brazil and India next year.
- Indian likely to export 0.5-1.5 million tons of sugar in the next marketing year i.e. 2013-14 considering around 1.5 million tons of raw sugar imports in the current year, according to Olam International ltd. It is notable that millers which import raw sugar have to re-export white sugar through ALS scheme.
- China sugar imports rise up by 25% to 504000 tons, raw value, in July 2013 compared to last year same period. July sugar imports takes the total Chinese sugar imports to 2.5 million tons in the first ten months which was 3.1 million tons a year earlier.
- Gur prices also shows steady today in key spot markets on Monday.
- Meanwhile, expected late crushing operations by millers in UP and Maharashtra also might urge farmers to divert their cane towards gur making. Weak lifting of gur by Rajasthan and Gujarat also curb any hike in prices of gur.

Outlook:

We expect prices to remain range bound with some weakness in the short term. Stockists would try to build stocks at lower rates before festival demand as expected.
