

## Sugar & Gur Domestic & International Fundamentals

- Spot prices on the sugar market ruled steady a quintal as trading was limited at the lower end amid shortage/non-availability of bold – fine variety, on the same hand S-grade ruled steady. In the futures market, prices were hovering in the range bound session.
- On the export front, too, chances are desolate due to bearish global prices. There is a sufficient inventory stocks in the Vashi market and supply from producers is ample. They are continuously selling in the local market. The Vashi market currently carries over 120 truckloads of stocks.
- In contrary to the domestic market, sugar prices in International arena move downwards considering higher sugar supplies from Brazil and India next year.
- Indian likely to export 0.5-1.5 million tons of sugar in the next marketing year i.e. 2013-14 considering around 1.5 million tons of raw sugar imports in the current year, according to Olam International Ltd. It is notable that millers which import raw sugar have to re-export white sugar through ALS scheme.
- China sugar imports rise up by 25% to 504000 tons, raw value, in July 2013 compared to last year same period. July sugar imports takes the total Chinese sugar imports to 2.5 million tons in the first ten months which was 3.1 million tons a year earlier.
- Gur prices also shows steady today in key spot markets on Monday.
- Meanwhile, expected late crushing operations by millers in UP and Maharashtra also might urge farmers to divert their cane towards gur making. Weak lifting of gur by Rajasthan and Gujarat also curb any hike in prices of gur.

### Outlook:

We expect prices to remain range bound with some weakness in the short term. Stockists would try to build stocks at lower rates before festival demand as expected.
