

25<sup>th</sup> September, 2013

#### Sugar & Gur Domestic & International Fundamentals:

- Downward pressure continues on sugar cash market ahead of new season. Supply side remains ample as millers seem to offload old stock.New season will start from 1<sup>st</sup> October.
- In a latest development, delhi based Simbhaoli Sugars has planned to establish a sugar processing unit near Kandla port gauging the better export opportunity in the new season. With crushing capacity of 1000 T per day the unit will be able to produce 3 lakh T white sugar.
- Tough competition from Brazil impacted adversely sugar export from India this year.Sugar production in new season(2013-14) is expected to touch 25 million T,5 lakh T more than last year as per market source.Potential buyers for Indian white sugar are Pakistan, Afghanistan and middle east countries. Brazil would remain dominant player once again.however, export opportunity for India still exists as prices have decreased considerably..
- China has imported 570628 tons of sugar in August 2013 which is up from 502199 tons imported in July 2013 and marginally lower quantity imported last year same period. China has imported around 90% of the total quantity from BrazilIndian white sugar offered at FOB \$480 per ton at which exporters are seeking foreign buyers.Gur prices traded unchanged today in Muzaffar nagar market.
- Cash gur market is likely to remain under presuure.. It is noticeable that gur production likely to start from last week of September in various parts of UP which would pressurize the prices of gur in the coming days.
- Thai raw sugar premium fall drastically to 100 points over ICE Oct contract from previous 160 points as reported. Sugar production will cross demand by 2 million metric tons in the 2013-14 season that starts in October in most countries, according to Czarnikow Group Ltd., which has clients in 83 countries. That's down from a previous forecast of 3.9 million tons. The surplus will shrink as output falls 2.2 percent and consumption advances 2.3 percent in 2013 and 2 percent next year

Outlook: We expect price to move in a narrow range. Fresh buying interest may emerge at lower level.
