

## Domestic Fundamentals:

- Guar prices traded firm in key spot markets on Saturday, due to lower arrival comparison to prior day.
- All India arrival of guar seed has been reported 29856 qtnl which is 5030 qtnl lower than previous day.
- It is notable that new crop arrives in Haryana with moisture content of 16-18% at present. However, arrivals will get pace in early November from Haryana region as expected.
- Crop of guar seed has not been damaged severely as expected earlier. Late sowed crop has grown upto knee size height in rain fed areas of Hanumangarh as reported.
- Normal rainfall and sufficient irrigated water availability for guar results in normal yield in Ganganagar region as reported.
- Around 24504 tons of guar gum (Splits and powder) exported to various countries in September month 2013 as reported. It is notable that India has exported 37000 tons of guar gum (Splits and Powder) in August month 2013.
- It is notable that new crop has started arriving in Ganga nagar and Haryana region. However, quantities are pretty less arriving in various mandis as reported.
- Recent rainfall in the Northern India would support the standing guar crop but also would delay the arrivals of new crop. It is notable that guar crop normally starts arriving in various parts of Haryana in the first week of October but now it would likely to arrive after 10 days of normal arriving time.
- According to a research company THL, guar cultivation has increased this year by 21% over last year.

## Outlook:

Guar sentiments are weak for medium to long term considering weak demand from International markets, higher carry over stock from last year and higher guar production scenario for current season representing huge surplus of guar stocks in the markets.
