

Sugar & Gur Domestic & International Fundamentals

- **In a latest development major banks in U.P. have refused to provide working capital for sugar mills** in Uttar Pradesh. The main reason behind this refusal is mainly attributed to higher SAP, mill's persistence losses and fresh uncertainty over cane crushing this year.
- **Stir over cane price between Maharashtra farmers Sugar cooperative mills is likely to continue as both the party's have varied opinion over cane price.** Farmers association has demanded Rs 2700-3500 per T as a first advance. Against it Sugar cooperatives say that they are unable to pay as production cost much higher than actual realization. Sugar crushing season starts from 1st Nov. in Maharashtra. Situation for farmers and millers may turn even more bitter if crushing gets delayed in both major sugar producing states.
- **ISMA in its latest release has claimed that sugar consumption in 2012-13 increased by 3.6 percent to 22.8 million T** against previous year. Even higher consumption and lower production by 4.5 percent to 25.14 million T could not provide support for cash market. The top two producers-Maharashtra and Uttar Pradesh have contributed 7.99 and 7.48 million T respectively in the season ending Sept. 2013. Sugar output in Karnataka Tamil Nadu and Andhra Pradesh was recorded at 3.46, 1.96 and 0.99 million T respectively.
- **Sugar recovery too has decreased from 10.25 percent to 10.03 percent during the review period.** Lower recovery and sugarcane crushing were the main reasons for lower sugar production last year. According to ISMA new season started with 8.85 million T carry in stock.
- **As per by Ministry of Agriculture, The total sugarcane Kharif sown area, as per reports received from States,** during the week ending 11.10.2013 stands at 48.74 lakh hectare as compared to 50.06 lakh hectare at this time last year which is down about 1.32 lakh hectare from previous year. However against it ISMA projected total sugarcane acreage for crushing in India in sugar season 2013-14, will be around 52.89 lakh hectare which is almost 9% higher than the initial estimates of Ministry of Agriculture of 48.53 lakh hectare.
- **Gur prices are moving in a range from last couple of weeks in Muzaffar nagar spot market.** However, overall sentiments remained bearish as expected delay in crushing season by UP millers might urge farmers to divert their cane for making gur.

Outlook: Domestic market is likely to trade steady in the short term

Global Market Update:

- **A fire that blazed through Brazil's Santos port has ravaged six warehouses, destroying 180,000 tonnes of raw sugar** in the Copersucar terminal. The fire hit all of the sugar giant's warehouses at the port, driving prices up to the highest in a year.
- **ICE March raw sugar prices rose more than six per cent to a one-year high on news of the fire before paring gains.** The March contract settled up 2.5 per cent at 19.48 cents per lb as per the news published in The Independent. A conservative estimate would be six months to get this in operational form again.
- **However, any bull run due to this latest development is unlikely as supply from other sources is capable of taking care** of emerging demand. Higher global price may provide some respite to Indian sugar exporters. Market participant expects prices to move up in the medium term.
- **Indonesia's annual sugar consumption is estimated at 5 million tonnes, while the country produces only 2.50-2.57 million tonnes** sugar per year. Therefore, almost 50 percent of domestic demand is met by import from other sources.
