

Sugar & Gur Domestic & International Fundamentals

- Dull trading activities in key sugar spot markets led the sugar prices steady today. However, ncindex sugar futures improved today over late sugarcane crushing operations in UP.
- UP state government asked Central government to increase the sugar import duty to 30 percent from current 15 percent to stop the raw sugar supply in India from Brazil. It is notable that decline in sugar prices in International markets gives refiners again an opportunity to import raw sugar from Brazil.
- India has exported 90000 tons of sugar in the first fortnight of November 2013-14.
- Farmers as well as millers both are dissatisfied with the cane purchasing price at Rs 250 per quintal which was fixed by Karnataka government.
- UP government kept the sugarcane SAP prices unchanged ~280 per quintal for 2013-14 compared to last year. However, mills don't want to start their crushing operations at current rate due to higher cost of production and lower sugar prices.
- Millers are waiting for next big event i.e. meeting over increase in sugar import duty by government which might give some respite to sugar millers.
- ISO sees sugar surplus would end in 2014-15 considering lower output by major sugar producers.
- India has imported 61520 tons of raw sugar from Brazil in the first two weeks of November 2013.
- Gur prices improved today due to same sugarcane SAP prices for 2013-14. However, overall sentiments are weak and prices should continue to break in the coming days.
- **Delay in crushing of sugarcane by millers would urge farmers to divert their cane towards gur production which would increase the gur production in the current marketing year as expected.**

Outlook: Domestic market is likely to trade steady as supply side is at comfortable level.
