

## Sugar & Gur Domestic & International Fundamentals

- Mixed sentiments recorded in key sugar spot markets on Friday as markets could not find adequate cues to decide the prices either side.
- Farmers as well as millers both are dissatisfied with the cane purchasing price at Rs 250 per quintal which was fixed by Karnataka government.
- UP government kept the sugarcane SAP prices unchanged ~280 per quintal for 2013-14 compared to last year. However, mills don't want to start their crushing operations at current rate due to higher cost of production and lower sugar prices.
- Millers are waiting for next big event i.e. meeting over increase in sugar import duty by government which might give some respite to sugar millers.
- ISO sees sugar surplus would end in 2014-15 considering lower output by major sugar producers.
- India has imported 61520 tons of raw sugar from Brazil in the first two weeks of November 2013.
- India has imported around 1.69 lac tons of raw sugar from Brazil in October 2013 as reported.
- Brazil center south region have crushed 38.8 million tons of cane till mid Oct which is 7.3% higher compared to cane crushed by mills at last year same period. Higher cane crushing data becomes the major influencing factor for decline in sugar prices in International exchanges.
- Gur prices improved today due to same sugarcane SAP prices for 2013-14. However, overall sentiments are weak and prices should continue to break in the coming days.
- **Delay in crushing of sugarcane by millers would urge farmers to divert their cane towards gur production which would increase the gur production in the current marketing year as expected.**

**Outlook:** Domestic market is likely to trade steady as supply side is at comfortable level.
