

Sugar Price Trend and Outlook:

Sugar prices are moving in a range presently as markets are waiting for any cues which would drive the prices accordingly. However, trade sources expect prices should rebound in an upward direction in the coming days due to upcoming Ramadan festive demand of sugar.

Domestic Sugar Price Outlook:

We expect prices of sugar likely to shoot up in the coming week. Traders selling sugar at higher rates and increasing summer sugar demand led the prices upwards.

News Highlights:

- Around 80000 tons of white sugar and 82000 tons of raw sugar has been exported in June 2013. White sugar mainly exported to Middle east countries and Sri Lanka loaded from Mundra and Tuticorin port. As far as raw sugar export is concerned, it is re-exported under ALS scheme to countries like Tanzania and Kenya from Chennai and JNPT port.
- Government has decided to increase the sugar import duty to 15% from 10% to curb further imports of sugar from overseas. It is notable that India has imported around 2 million tons of raw sugar from overseas especially from Brazil till June starting from Oct in 2012-13 marketing year.
- Indian trade houses and refiners continue sugar import shipments from Brazil considering import parity despite of depreciation of Rupee. However, recent hike in sugar import duty from 10 percent to 15 percent might discourage the refiners due to disparity. In addition to it, increasing sugar prices in International arena from last couple of weeks dampen the sugar import possibilities as expected.
- India has imported 2.74 lac tons of raw sugar in June month mainly from Brazil which is lower from 3.06 lac tons of raw sugar imported (mainly from Brazil) in May 2013. Imported raw sugar mainly landed at Kolkata and Kandla port as reported
- Opposition is trying to pressurize UP government to increase the SAP for next marketing year to Rs 400 per quintal.
- Maharashtra mills have quoted higher prices compared to prior day considering upcoming festive demand as well as export demand.

- UP millers, which are suffering from lower demand and lower prices and profitability, are now seeking some help from government to save sugar industry. It is notable that year on year increase in sugarcane prices increase the cost of production of sugar. In the meantime, prices of sugar crash like any thing in domestic arena thanks to lower demand as upcountry buyers are purchasing sugar from Maharashtra due to better parity.
- Western UP and Haryana might get rainfall in the coming week that would help the standing sugarcane crop.

Sugarcane Sowing Update:

Total around 47.73 lac hectares of sugarcane sowing has been done till 28th June 2013. However, this year progressive sowing till last week is 4% lower compared to last year same period. It is notable that sugarcane has been sowed in 2012-13 was 49.35 lac hectares till last week.

As satellite picture shows, till last week around 20% excess rainfall has been recorded in key sugarcane growing belt except eastern and central part of Maharashtra which receive normal rainfall this year till date.

Raw Sugar Import Opportunity:

Indian sugar refiners now slowly losing opportunity to import raw sugar from Brazil as higher degree of decrease in sugar prices in international markets compared to domestic markets decrease the import parity in case of sugar imports. In addition to it, govt. stand to increase raw sugar import duty to 15% also dampen the possibility of import.

Indian indicative raw sugar CIF prices from Brazil quoted at \$462.09 per ton (including 10% import duty) and Indian domestic refined sugar FOB prices quoted at \$528.09 per ton Kolhapur based.

Comparative raw sugar CIF prices from various sugar sourcing countries to India are mentioned in the table below:

Indicative Import Parity/ Disparity (USD/MT) (\$=Rs.60.69) till 5 th July 2013			
	From Brazil	From Thailand	
CIF India (USD/MT)	462.09	519.51	

India has imported 2.74 lac tons of raw sugar in June month mainly from Brazil which is lower from 3.06 lac tons of raw sugar imported (mainly from Brazil) in May 2013. Imported raw sugar mainly landed at Kolkata and Kandla port as reported

Gur Market Scenario and Outlook

Gur prices are moving in a range presently owing to consistent arrivals and demand in cash market.

However, considering lower stock position in the cold storages, prices of gur likely to surge in the medium to long term.

Total around 1224000 bags of gur (40kg each) stored in cold storages till 17th June 2013 lower from 1317000 bags of gur at last year same period (40kg each). Out of total 1224000 bags of gur, around 750000 bags of Chaku gur, 131000 bags of Rascut, and 196000 bags of Papdi, stored in the cold storages as reported.

Gur prices are likely to move in a range with firm tone in the coming week owing to lower gur stock.

International Scenario

Prices of sugar declined in International arena last week due to consistent sugar supply from Brazil and lower demand of Thai sugar.

We expect prices of sugar should move in a range in the coming week in ICE as well as LIFFE.

International Market News Highlights:

- Brazil sugar export rise to 2.24 million tons in June up from 1.941 million tons in the previous month.
- Sugar millers in Brazil's center south, the main growing region of the largest producer, will use more of this year's crop to make ethanol than previously forecast because of unseasonal rain.
