

Domestic Fundamentals:

- Most of the edible oils feature range bound movement to slightly firm tone on moderate demand.
- Rapeseed oil witnessed gains in major physical market due to bad weather in key mustard seed growing regions of India. However, higher mustard acreage and in expectation of higher mustard seed production in the current season limit excessive gains.
- Palm oil mostly featured slightly weak tone on higher palm oil products imports and lackluster demand.
- India has imported record 11,57,130 tons edible oil in January 2013, 75% higher than the imports in January 2012, surpassing a previous high of 10,00,942 tons in August 2010.
- Edible oil basket is expected to feature range bound movement with weak bias in the days ahead on bearish cues from international market and sluggish domestic buying.

International Market Fundamentals:

- Malaysia Sets 4.5% CPO Export Tax for March after two consecutive months of no duties that boosted crude shipments from Malaysia and helped to ease stockpiles. Indonesia set February CPO duties at 9% from 7.5% previously.
- Data from cargo surveyor Intertek Agri Services showed that crude shipments have doubled in the first 15 days of February to 229,610 tons as a result of export-tax advantage Malaysian exporters had over top producer Indonesia.
 Overall Feb. 1-15 shipments rose 18% from the previous month to 673,555 tons, Intertek said. Another surveyor, SGS (Malaysia) Bhd., pegged shipments for the period at 649,045 tons—up 14%.

Outlook: Edible oil prices are expected to feature range bound to weak tone in the near-term.
