

Domestic Fundamentals:

- Mixed trend featured in the various edible oils on varied factors Saturday.
- Refined soy oil witnessed mixed trend, palm oil, sunflower oil and refined cottonseed oil mostly remained steady.
- However, rapeseed oil featured steady to firm tone.
- The USDA monthly supply and use report was slightly bullish with downward revision in Argentine soybean outturn. Market participants await MPOB's report on Malaysian palm oil statistics, which may confirm fresh directional moves to the market.
- Edible oil basket is expected to feature range bound to weak movement in the days ahead on sluggish domestic buying. However, slow soybean offloading by farmers may limit downside risk in the prices.

International Market Fundamentals:

- Malaysian palm oil ending stocks is likely to ease by 6.1 percent to 24.2 lakh tons from January. However, Malaysia's palm oil output in February may fell by 18.1 percent to 13.1 lakh tons from a month ago on seasonally lower palm oil production – Reuters Poll.
- Brazil's government slashed its soybean crop by 1.3 million tons for the 2012/13 citing too little rain in parts of the south Brazil in January and too much rain in top-producing Mato Grosso state in February. Brazil soybean crop seen at 82.1 million tonnes, a huge increase from last season's 66.4 million tonnes, but less than the 83.4 million tons forecast in February.

Outlook: Edible oil prices are expected to feature range bound to weak movement in the near-term.
