AGRIWATCH

Domestic Fundamentals:

- Most of the edible oils featured steady tone owing to normal demand and rains over key oilseed producing regions restrict the gains, Wednesday.
- Groundnut oil guoted higher at major market owing to better buying from wholesalers and attractive prices support the buying interest. However, adequate supplies in the cash market and normal monsoon over key groundnut growing areas likely to weigh on the market in the medium term. Groundnut oil quoted Rs 925 per 10 Kg, up Rs 50/10 Kg from previous trade session. As per the latest report of Ministry of Agriculture, sown area for Kharif groundnut stood at 15.75 lakh hectares as on 27 June 2013. However, groundnut sowing was 4.22 lakh hectares in the corresponding period of last year.
- Refined palm oil featured steady tone tracking gains in the international palm oil market. However, normal demand and higher oilseed production in the current season limit excessive gains.
- Edible oil basket is expected to feature range bound to slightly firm tone in the days ahead in expectation of stock build up ahead of Ramadan. However, normal monsoon forecast and correction in the international palm oil market may limit gains.

International Market Fundamentals:

- BMD was ended higher on Wednesday in expectation of easing stocks and positive Malaysian palm oil products exports. However, market participants remain inactive ahead of MPOB's report on the Malaysian palm oil statistics report.
- Positive palm oil products exports reported from Malaysia for June. cargo surveyor Intertek Testing Services Cargo report depicts a 7 percent gains in the exports of Malaysian palm oil products for June to 13.5 lakh tons compared to the last month.

Outlook: Edible oil prices are expected to feature range bound to firm movement for the short term.
