AGRIWATCH

Domestic Fundamentals:

- Most of the edible oils witnessed a weak tone in prices across the major markets on recovery in the Indian rupee and need based demand.
- On the supply side, Sown area for Kharif oilseed stood at 188.16 lakh hectares as on 29 Aug 2013. Oilseeds sowing were 167.13 lakh hectares in the corresponding period of last year – Ministry Of Agriculture.
- Sown area for Kharif Soybean stood at 121.72 lakh hectares as on 29 Aug. However, soybean sowing was 106.83 lakh ha in the corresponding period last year. Higher area covered in Madhya Pradesh, Maharashtra and Rajasthan compared to last year. Last year India's total soybean acreage was 107.03 lakh Ha.
- Weakness in the Indian rupee against US dollar, gains in the international palm oil market and weather concern over key soybean producing regions of US may favor the bulls for short term. However, expected rise in oilseed production in the current season support edible oils supplies prospects and may limit excessive gains.
- Edible oil basket is expected to feature range bound in the days ahead due to weak Indian rupee and concerns over crop conditions. While, higher oilseed sowing in the current season may limit upside.

International Market Fundamentals:

• Exports of Malaysian palm oil products from Aug. 1-25 rose 7.1 percent to 1,162,884 tons from 1,085,392 tons shipped during July 1-25 - cargo surveyor Intertek Testing Services.

Outlook: Edible oil prices are expected to feature range bound for the short term.
