

Domestic Fundamentals:

- Edible oil basket featured steady to slightly weak tone limited buying and recovery in the Indian rupee.
- Indian Government has revised the tariff value for of crude palm oil to US \$ 914 increased by US \$65 per tons and raised base import price on refined palmolein by \$60 per tons to US \$ 960 per tons. Moreover, USD 1,023 per toms sets as a new base import price for crude soybean oil.
- Palmolein quoted lower at major cash market on lackluster buying. However, upcoming marriage season and winter seasonal demand may prop up the prices. As per SEA of India, veg. oils imports during Oil Year 2012-13 (Nov-Oct) including edible oil and non-edible oil recorded at 106.8 lakh tons, up by 4.77% as compared to the corresponding period of last year.
- India imported 40,000 tons of U.S. soybean oil for delivery in the current marketing year (Oct-Nov) 2013/14. (Reuters).
- Edible oil basket is expected to feature steady tone in the near-term. While, higher Kharif oilseed arrivals may cap the excessive gains.

International Market Fundamentals:

- CPO at BMD witnessed gains on expectation of slower pace of palm oil production and rising exports. Malaysian 1-15
 November palm oil exports down 4.6 on m-o-m basis. Malaysian government has set its crude palm oil export tax for
 December at 5.0 percent, up 0.5 percent from last month.
- Palm oil futures will probably trade in a range of 2,400 ringgit to 2,600 ringgit per tons and could surge to 2,800 ringgit
 (\$872) per tons in the next six months in expectation of lower Indonesian palm oil production and biodiesel
 developments in Indonesia. Moreover, global palm oil supply would rise by 2.5 million tons in the vegetable oil year
 starting from Oct. 2013, lower than his previous estimate of 3.5 million tons.

Outlook: Edible oil basket is expected to feature steady tone in the near-term. While, higher Kharif oilseed arrivals may cap the excessive gains.
