

## **Domestic Fundamentals:**

- Edible oil basket featured a mixed tone, Tuesday. Coconut and palm oil quoted slightly higher. While, mustard and soy oil witnessed losses. Rapeseed oil featured weak tone on limited buying against adequate mustard seed stocks. Moreover, good weather condition over key mustard seed producing belts adds pressure to the market sentiments. Sown area for Rabi groundnut seed stood at 68.86 lakh hectares as on 26 Dec. 2013, up 4.38 lakh hectares compared to the corresponding period last year Ministry of Agriculture.
- Palm oil and its derivatives traded with a steady to slightly firm note tracking gains in the international palm oil market and need based buying. India's palm oil imports during 2013/14 seen at 8.30 million tons, up 0.05 million tons from last year – Dorab Mistry.
- Groundnut oil quoted lower at Rajkot market on subdued demand and higher groundnut seed production in the current year. Groundnut oil quoted Rs 800 per 10 Kg at Rajkot market.
- Edible oil basket is expected to feature steady to firm tone in the near-term. While, recovery in the Indian rupee and sideways trend in the international oil & fats market may cap the gains.

#### International Market Fundamentals:

- CPO at BMD ended higher due to better than expected Malaysian palm oil export figures and weather concern in Malaysia. While, an expected rise in the global soybean supply and rains over South American countries curb excessive gains.
- According to data released by cargo surveyor Intertek Testing Services, exports of Malaysian palm oil products for Dec fell 1.1 percent to 1,433,910 tons from 1,449,664 tons shipped in November.

**Outlook:** Edible oil basket is expected to feature steady tone in the near-term. While, higher Kharif oilseed arrivals may cap the excessive gains.
