

Wheat Domestic Fundamentals:

- **Wheat cash market traded under pressure** ahead of new crop despite bonus (Rs 150 per qtl.) announced by Rajasthan and Madhya Pradesh govts. over and above MSP of Rs 1350 per qtl. for MY 2013-14. Procurement is scheduled to be start from 15th of March in Gujarat, Rajasthan and Madhya Pradesh.
- **As crop in Gujarat is lower and private trades** are active, procurement quantity in Gujarat will be lower than expectation. However, contribution to central pool kitty from Rajasthan and Madhya Pradesh is set to rise on the back of bonus and improved production estimate.
- **Private traders have been allowed to export wheat** from govt.'s godowns at Rs 1480 per qtl. from last year's crop . They have to bear freight cost too from ware house to destination .With new arrivals, exporters will not prefer to buy bulk quantity for export due to disparity when we add total costing including freight. Notably, Govt. has nodded its head on continuation of wheat export without quantity restriction.
- **With continuation of export procurement target** of 44 (set by govt.) is unlikely to meet this year despite bumper production, hiked MSP and bonus. As per market expectation govt. will not be able to procure more than 38 million T wheat in MY 2013-14.
- **Maximum bid received in PEC tender on 6th March 2013** for 40,000 T was \$303.40 /MT. The lowest bid was recorded at \$292/MT. Other bidders who offer \$ 303.40 MT, out of the trend can buy wheat under tendered quantity.
- Traders and Analysts are estimating wheat crop around 94 million tonnes this year. We expect prices to dip further.

International Market Update:

- **Wheat production in Australia is expected to be 24.9** million tonnes due to increased planting and higher yields from better growing conditions, which is up from 22.077 million tonnes produced in the 2012-13 season- (ABARES)
- **FAO sees record global wheat production this year due** to higher area coverage in Europe and improved weather conditions in US. Global wheat production is expected to increase by 4.3 percent from last year to 690 million T this year.
- **Outlook for wheat crop in US has improved** and stock exceeded form expectation there.

Domestic market Outlook: Wheat cash market is set to decline further and weak bias likely to continue.
