

## Wheat Domestic Fundamentals:

- Wheat cash market trades under pressure as medium and bulk buyers are not buying aggressively at this point of time. They are fulfilling only their immediate requirements on easy supply side outlook. Some improvement on price front is expected at the end of September when stock in private hands starts declining and buyers turn towards govt.'s stock.
- Wheat from Bihar through private channel is being loaded to kolkatta at Rs 1560/1580 per qtl. Millers in West Bengal are sourcing wheat from Bihar due to cheaper and ample availability. Traders in M.P has revealed that wheat demand is coming from local market and Maharashtra, traders are selling wheat at Rs 1700-1720/Q, delivered basis to millers in Maharashtra, whereas south Indian millers are buying wheat from U.P, Rajasthan majorly at Rs 1800-1825/Q, delivered basis.
- According to wheat scientist Ronnie Coffman, Indian does not face Ug99 rust disease risk at present. Ug99 is black wheat stem rust fungus which can destroy 70% wheat yield.
- Wheat cash market is trading at almost unchanged previous level in clueless market. However, festive demand for wheat products may restrict market to dip further. Supply side remains ample and local demands are being taken care of by private trades.
- As export opportunity for India is diminishing fast due to widening price gap, we expect easy supply side to continue in the local market. There seems no wheat export opportunity from India as of now due to higher prices despite of weak rupee. Ukraine and Russia is exporting wheat at USD 240-244/MT, FOB Black sea region, US is selling wheat at USD 260-270/MT.
- Wheat inflation has marginally decreased in July to 13.42% year on year basis from 13.83% in May 2013. Though WPI has increased marginally 206.2 in June from 205 in May 2013. Inflation has increased marginally by 0.58% month on month basis.
- There is a general talk in market that government may offer some discount for selling wheat through OMSS as election are round the corner. Government would try to curb inflation within limit. Despite, lower production, overall sentiment in the market remains bearish.

## International Market Update:

- Russia so far has harvested 37 million tonnes of wheat so far and is expected to have 15 million tonnes of surplus wheat to export as compared to 11 million tonnes in the previous season. This year Russia is expected to harvest wheat near 50 million tonnes and government is keen to replenish its cereal stock by buying 6 million tonnes from open market.
- China has recently bought Australian standard white wheat at USD 330/MT, CNF for December delivery. China might buy 4 million tonnes of Australian wheat in next marketing year beginning from 1<sup>st</sup> Oct overtaking Indonesia as largest Australian wheat importer.

**Domestic market Outlook:** Domestic market is likely to trade range bound with weak bias.
