- For the country as a whole, cumulative rainfall during this year's monsoon has so far upto September 30, 2014 has been 12% below the Long Period Average (LPA). The actual rainfall recorded at 777.5 mm against the 886.9 mm of normal rainfall-IMD.
- According to Ministry of Agriculture, around 101.05 lakh hectare of area has been sown under pulses (Kharif) this year as on September 29, around 6.45% lower than the previous year, when it was 108.13 lakh hectares during the same period.

International Fundamental:

- According to Union Nationale Interprofessionnelle des Plantes Riches en Proteines (UNIP), exports of field pea from France surged up in August, fairly higher when compared to previous month but lower as compared to the previous year. Around 13,480 metric tons (MT) of export shipment been totaled during August which was 5 775 MT previous month and around 15,525 MT last year during the same month. Major export destination was Europe particularly Belgium followed by Spain and Norway.
- In UK, farmers are likely to shift towards pulses (pea and beans) crop in upcoming sowing season from rape seed and sugar beet due to falling prices. The pulses arable area would be higher in this spring season against the 30,000 ha. planted during the spring season in last year. Meanwhile, stocks of spring pulses seed are unseasonably low, and would be insufficient for increased demand. The pulses prices are continuously decline,

but sellers still get 30-35 Euro per tonne premium over feed wheat with an additional 15-25 Euro per tonne paid for human consumption.

Outlook: - Pluses are likely to witness range-bound to weak movement on new crop arrivals. Good urad crop from Madhya Pradesh will weigh on the prices.
