- For the country as a whole, cumulative rainfall during this year's monsoon has so far upto September 30, 2014 has been 12% below the Long Period Average (LPA). The actual rainfall recorded at 777.5 mm against the 886.9 mm of normal rainfall-IMD.

International Fundamental:

- In Canada, Pea and lentil prices decline as new crop harvesting is near to finished.
- In UK, farmers are likely to shift towards pulses (pea and beans) crop in upcoming sowing season from rape seed and sugar beet due to falling prices. The pulses arable area would be higher in this spring season against the 30,000 ha. planted during the spring season in last year. Meanwhile, stocks of spring pulses seed are unseasonably low, and would be insufficient for increased demand. The pulses prices are continuously decline, but sellers still get 30-35 Euro per tonne premium over feed wheat with an additional 15-25 Euro per tonne paid for human consumption.

Outlook: - Pluses are likely to witness range-bound to weak movement on new crop arrivals. Good urad crop from Madhya Pradesh will weigh on the prices.
