- French Minister of Agriculture released a plan to increase the production of protein crops includes (field peas, fava beans, lupin, alfalfa, and soybeans) in France between 2014 and 2020. They are needed to meet the nutritional requirements for livestock and poultry feeds. The France is the leading combined livestock (beef, pork, and dairy) and poultry producer in the European Union (EU) but has a structural shortage in production of protein crops, which requires it to import 40% of its domestic consumption needs. The French production of protein crops has declined in the past twenty years and, in 2013, accounted for less than two percent of total field crop area. The Farmers will be granted between 100 and 200 euros per hectare per year of protein crops between 2014 and 2020. The French production of protein crops (in tonne):
