Pulses Domestic Fundamentals:

Pulses market noticed mixed tone.

- The Food Corporation of India (FCI) may start procurement of Pulses and oilseed in addition to wheat and rice, once the ministry of agriculture decides to do so. A long term export and import trade policy with respected to minimum support price (MSP) is also possible.
- Prices of split pigeon peas (Tur) is likely to remain strong in the next two months following the expectation of lower output this year compared to the previous, said a price forecast study conducted by Junagarh agriculture University (JAU).According to the study prices of Tur could range in Rs. 5200-5700 per quintal in March. Tur production in India during 2014-15 would be 16.7 percent lower at 2.74 million tonnes compared to last year production when the same was 3.29 million tonnes. The study foresees Tur consumption at about 3.6 million tonnes.
- Pulses importers and processors have urged Union Finance Minister to set up Pulses Upgradation Fund, with an initial outlay of Rs. 5000 crores in order to upgrade the obsolete and outdated technology in this sector.
- The government of India is focusing on raising production and storage of imported food items including pulses and edible oils in order to increase domestic supply and control price rise, said Food Minister Ram Vilas Paswan on Monday. According to him, farmers should be encouraged to grow crop other than rice and wheat and they should be given incentives for growing the items for which we are dependent on other countries like pulses and oilseed.
- **Pulses MBR Fumigation Guidance at Indian Ports**

  Following is the abstract of circular regarding methyl bromide(MBR) fumigation guidance given by the Plant & Quarantine Dept

  The interim fumigation arrangement with five times penalty had expired on December 31, 2014.

  In an order passed by Department of Agriculture & Cooperation (Plant Protection), Ministry of Agriculture a permanent solution which will hold good till an alternative is found for Methyl Bromide has been achieved and no extensions will have to be sought in the future.

  As per Order F. No. 8-65/2012-PP II dated 30th October, 2014, “till such time that effective alternatives to Methyl Bromide are found and notified, import of all agricultural commodities for which treatment with Methyl Bromide fumigation is prescribed in Plant Quarantine (Regulation of import into India) Order 2003 will be allowed without offshore methyl bromide fumigation from those countries only which certify the discontinuance of the chemical from Phytosanitary application.”

  “Such consignments will be subjected to Methyl Bromide fumigation in India from approved treatment providers at the ports of entry and on payment of penal fees, provided all other conditions under Plant Quarantine (Regulation of Import into India) Order 2003 have been complied with.”

  Please note that all importers need to take the following steps:

  1. For countries where Methyl Bromide fumigation is banned: Please arrange for a letter from the NPPO of the origin country certifying that MBR fumigation is banned in their country.
  2. For countries where Methyl Bromide fumigation is not possible due to extreme cold weather conditions: Please arrange for a letter from the NPPO of the origin country certifying that MBR fumigation is not possible in the specific months (state which month to which month) when the weather is extremely cold.

  Once this is done, it will be possible for the Plant & Quarantine office to issue an advisory allowing MBR fumigation at port of arrival at five times penalty and stocks will not get held at port.

  Please note that the letter has to be issued by the nppo or relevant government authority.

  A letter from the exporter will not be accepted by the plant & quarantine office in india.

  (Source-Plant & Quarantine Dept. - Faridabad office)

- According to Ministry of Agriculture, total acreage of Rabi pulses stood 145.92 lakh hectares this year, around 10.04% lower when compared to the acreage of last year which was 162.21 lakh hectares.

- At JNPT port (Mumbai),
  - ✓ 10 containers of Australia chick peas,21 containers of green mung beans,22 containers of l s kidney beans,5 containers of lentils,7 containers of toor dall and 25 containers of toor whole arrived on Feb.23,2015.
  - ✓ 3 containers of Canada green peas, 31 containers of Canada lentils, 3 containers of green mung beans, 3 containers of l s kidney beans and 55 containers of toor whole arrived on Feb.20, 2015.

Pulses International Fundamental:

According to the AAFC's January Outlook release in February

- **For dry peas-**
  In 2014-15, Canadian exports are expected to increase to 2.9 Mt, with India, China and the Bangladesh as -out stocks are forecast to decrease sharply due to due to lower supply and higher exports. The average price in 2014-15 is expected to fall from 2013-14 as a larger proportion of the crop is feed quality peas which are priced at a discount.
  During the month of January, the on-farm price of yellow peas in Saskatchewan rose by $30/t while the green pea price was relatively unchanged.
  In 2015-16, seeded area is forecast to rise by nearly 4% from 2014-15 to 1.6 Mha because of higher potential returns relative to other crops, good logistical movement and solid export demand. Production is expected to increase by 10% to 3.8 Mt, due to a return to higher expected yields. Supply is forecast to rise marginally due to lower carry-in stocks. Exports are expected to be slightly lower than 2014-15 and as a result, carry-out stocks are expected to rise sharply but not be burdensome. The average price is expected to remain strong due to strong global demand but slightly lower than 2014-15.
- **For Lentils-**
  For 2014-15, exports are forecast to fall by 6% to 1.65 Mt. India, Turkey and the United Arab Emirates are currently the top three export markets. Domestic use is expected to decrease due to lower supply. Carryout stocks are expected to fall to the lowest level since 2009-10. The overall average price is forecast to be above 2013-14 due to the tight carry-out stocks.
  During the month of January, the on-farm price of large green lentils in Saskatchewan rose by $65/t while the red lentil price increased over $80/t.
  For 2015-16, area seeded in Canada is forecast to increase by 11% to 1.4 Mha, due to competitivereturns relative to other crops, but may be limited due to quality seed availability. A higher yield forecast isexpected to result in production increasing by 17% to2.15 Mt. However, due to tight carry-in stocks, supply is forecast to increase by only 10% to 2.2 Mt. Exports are expected to be unchanged from 2014-15 at 1.65 Mt despite the larger exportable supply. Carry-out stocks are forecast to increase sharply. With the assumption of a more normal grade distribution and lower grade discounts, the overall lentil price is forecast to increase from 2014-15.
- **For Chickpea**
  For 2014-15, exports are forecast to increase from 2013-14. The EU-27, the US and the Middle East have been the main markets for Canadian chickpeas to-date. Carry-out stocks are expected to increase for the third year in a row to burdensome levels. The average price is forecast to fall for the third consecutive year, due to larger world and Canadian supply.
  For 2015-16, the area seeded is forecast to decrease from 2014-15, largely due to larger carry-in stocks and lower prices. As a result, production is expected to decrease to 115 kt. However, supply is expected to only fall marginally from last year due to the large carry-in stocks. Exports are expected to be unchangedfrom last year and carry-out stocks are expected to decrease, but remain burdensome. The average price is forecast to be unchanged as it will be limited by higher expected world supply.
