

Pulses Domestic Fundamentals:

Chana market is likely to trade range bound to slightly firm as market has already taken account of recent loss incurred by inclement weather. If freight rate softens further (unlikely) some downward correction is a visible possibility in the short term. Market participant's opinion that there is a tight position in cash market and it would continue to restrict market from any major dip. Inner tone in the market remains firm.

Untimely rain could lead to rise in retail inflation: Untimely rain in country over the last one month may push the retail inflation to nearly 6 per cent in the next three months, said market participants. According to the initial damage assessment conducted by ministry of agriculture, the recent unseasonal rain has damaged around 10.7 million hectares of land or about 18 per cent of total winter (Rabi) crop area sown. Around 20 per cent of total area sown has damaged in wheat, 22 per cent in oilseed and 8 per cent in pulses.
