Firmness in Tur market continues on rising fear of lower acreage on deficit rainfall allover India. IMD latest update says 10 percent deficit rainfall so far and it may increase to 12 percent by the end of rainy season till September. Market participants and growers have started expressing concern about emerging possibility of lower tur production in states of Maharashtra and Karnataka. All these developments at sowing stage have supported pulses market and uptrend is likely to be continued in the days ahead.

Government of India is planning to barter surplus sugar for pulses with countries like Canada, Indonesia and Malaysia. India imports around 3-4 MMT of pulses to meet its domestic demand and exports around 18-19 MMT of sugar with carryout of 10 MMT.
