- **According to the stat pub, Canada Lentil Production for 2015-16 is expected to increase by 5 percent to 2.083 MMT.** Canada had produced 1.987 MMT last year. Despite hope for higher production export volume is likely to decrease from 2.229 to 2.0 MMT in 2015-16. Canada growers predict the price range for all lentils in between \$750-\$780 in 2015-16 due to better prospects of export demand. Lentil prices were ruling \$585 (average) per tonne in the last season. As prices are expected to rule higher, local sellers and stockists, even farmers would prefer to retain stock for garnering maximum profit and it may slow down the current pace of export volume.
- **According to the statpub, Canada Lentil No. 1 variety harvest** could increase from 5% (last year) to 12 % this year and No.2 variety from 32% to 59% this year whereas No.3 and sample grade decreased from 53% and 10% to 27% and 2% respectively. Canadian lentil No. 2 variety is the FAQ (fair average quality) variety.
- **According to the Union Nationale Interprofessionnelle des Plantes Riches en Proteines (UNIP),** French Pea exports in the month of July were 34130 MT which is around 1% higher than the month of June that was 33720 MT. The increase in exports is due to good demand of pea from Indian subcontinent.
- **According to the latest ABARES report, Australian Chickpea production forecast 2015-16** is 990 kilo tonnes which are around 78% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to the Pakistan Bureau of Statistics (PBS), pulses net import in fiscal year** (July to June) 2014-15 was around 6.60 Lakh tonnes which were around 32 % higher than 2013-14 that was 4.99 Lakh tonnes. Pakistan imports around 50-60 Lakh tonnes of pulses annually to meet its demand mainly from countries like Australia, Burma, Tanzania and Ethiopia.
