

Pulses Domestic Fundamentals:

- According to the Andhra Pradesh Agriculture Ministry, pulses area is 4.14 Lakh Ha which is around 52% higher than the last year at the same time area of 2.72 Lakh Ha. The highest percentage increase in area as compare to last year was recorded in Urad due to higher prevailing market prices.
- According the local farmers and trade source from Kanpur region of Uttar Pradesh, rabi pulses sown area may decrease due less rainfall which affects the soil moisture and thus farmers could shifts towards other crops or delay the sowing of pulses.
- According to the Ministry of Agriculture, area under Rabi pulses throughout the country stood 74.06 lakh hectares as on 21st November this year, around 4% lower when compared to the area sown during corresponding period last year which was 77.42 lakh hectares.
- As per latest feedback received from farm and trade communities sowing of masoor in major growing belt of Patna, Barh is running behind normal schedule so far. Sowing in these regions is said to be completed by 60 percent is expected to be over around December end. Lower coverage may be compensated in due course till December. If sowing time gets over and farmers fail to cover their desired area, they may grow chana in that field. At this point of time it is very difficult to conclude lower area coverage.
- New harvested Tur crop starts hitting Solapur market of Maharashtra region. New tur prices are in the range of 11400 to 11700, having moisture level of 15-16%, higher than normal. Arrivals are being reported around 100-150 bags per day. As the weather condition is cloudy, arrival pace may get delayed.
- According to latest report released by Ministry of Agriculture, Gram area till date (as on 13.11.2015) was registered at 24.47 Lakh Ha which was around 43% higher than the last year in the corresponding period. Last year it was 17.10 Lakh ha. Till date area of Gram in Maharashtra and Karnataka has increased whereas in Rajasthan and Madhya Pradesh has decreased as compare to last year.
- According to IBIS (provisional data), import of pulses in the week (09 Nov-15 Nov) was around 63 Thousand tonnes at major ports in India, around 171% lower than previous week's (02 Nov-08 Nov) import of 171 Thousand tonnes.
- According to the Gujarat Revised Kharif Pulses Advance Estimate, Pulses Kharif production is estimated to be 347 thousand tonnes which is around 7% lower than the previous estimate of 374 thousand tonnes. Lower estimate is due to expectation of lower yield.
- According to the latest inflation update released by Government of India, Pulses Monthly Wholesale Price Index for the month of October is 364.4 which are around 9 % higher than the month of September. In month of September Wholesale Price Index was 333.8.
- From the total volume of 1.33 lakh tons of pulses seized from the hoarders in across the India, around 4,660 tons has been released in the open market in order to relief the consumers from the skyrocketed pulses prices.
- Most of the states, which had seized pulses from hoarders, have started releasing the commodity in the market at the fare price range. Karnataka has released around 209 tons of pulses from the total volume of 25,448 tons confiscated during the raids.
- Government of Maharashtra has decided to release the seized pulses in the local market in order to relief consumers from soaring prices. According to the official Maharashtra has seized around 86,000 tons of pulses, which are now expected to be sold at the price range of Rs 90-100 per Kg. by the wholesaler and retailer from whom it being confiscated.
- In order to reduce the dependency on imports, Cabinet Committee on Economic Affairs (CCEA) has increased the MSP of Lentil (Masoor) and Chickpea (Chana) by Rs 250 each to Rs 3325 and Rs 3425 per quintal respectively. Apart from this, CCEA has also approved the bonus of Rs 75 per quintal for these two pulses over and above the support prices.
- Arrival starts from newly harvested Tur crop in limited quantity in Kanpur mundi. The price for the new crop was quoted at Rs8300 to Rs 8400 per quintal. As new crop has higher moisture level, traders are offering lower quotes for the produce. It has moisture level of 15-16% and is coming from Meerut line with 100-125 bags per day.

- **According to the Stat pub, French Pea exports in the month of September** were 38125 MT which is around 2% higher than the month of August that was 37285 MT. The increase in exports is due to good demand of pea from India which imported 27,280 MT of peas in September month.
- **According to the trade sources, Burmese Tur crop is in good condition** and they are estimating around 4 Lakh MT productions this year. Harvesting of tur in Burma generally begins in December and export shipments start from January.
- **In a view to keep the prices stable, Trading Corporation of Pakistan** has issued two tenders to import 10,000 tonnes of Chickpeas. The tender for import of 5,000 each tons will be opened on 5th and 16th November respectively. Additional demand from Pakistan is expected to push up chickpeas prices in the international market.

- **According to the stat pub, Canada Lentil Production for 2015-16 is expected to increase by 5 percent** to 2.083 MMT. Canada had produced 1.987 MMT last year. Despite hope for higher production export volume is likely to decrease from 2.229 to 2.0 MMT in 2015-16. Canada growers predict the price range for all lentils in between \$750-\$780 in 2015-16 due to better prospects of export demand. Lentil prices were ruling \$585 (average) per tonne in the last season. As prices are expected to rule higher, local sellers and stockists, even farmers would prefer to retain stock for garnering maximum profit and it may slow down the current pace of export volume.
- **According to the statpub, Canada Lentil No. 1 variety harvest** could increase from 5% (last year) to 12 % this year and No.2 variety from 32% to 59% this year whereas No.3 and sample grade decreased from 53% and 10% to 27% and 2% respectively. Canadian lentil No. 2 variety is the FAQ (fair average quality) variety.
- **According to the latest ABARES report, Australian Chickpea production forecast** 2015-16 is 990 kilo tonnes which are around 78% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
