

### Pulses Domestic Fundamentals:

- According to the Ministry of Agriculture, area under Rabi pulses throughout the country stood 128.24 lakh hectares as on 01<sup>st</sup> January this year, around 2.4% lower when compared to the area sown during corresponding period last year which was 131.33 Lakh hectares.
- According to latest report released by Ministry of Agriculture, Chana area till date (as on 01.01.2016) was registered at 81.08 Lakh Ha which was around 2% higher than the last year in the corresponding period. Last year it was 79.95 Lakh ha. Till date sowing area of Chana in Maharashtra, Andhra Pradesh and Karnataka has increased whereas in Rajasthan and Madhya Pradesh it has decreased as compare to last year.
- According to latest report released by Ministry of Agriculture, Peas area till date (as on 01.01.2016) was registered at 9.60 Lakh Ha which was around 6% lower than the last year in the corresponding period. Last year it was 10.19 Lakh ha. Peas Sowing Area in Madhya Pradesh till date has increased by 56% this year as compare to last year from 2.88 Lakh Ha to 4.50 Lakh Ha.
- According to latest report released by Ministry of Agriculture, Rabi Urad area till date (as on 01.01.2015) was registered at 6.29 Lakh Ha which was around 10% higher than the last year in the corresponding period. Last year it was 5.72 Lakh ha. Urad area in Andhra Pradesh has increased from 1.35 to 2.96 Lakh ha this year as on date due to higher domestic prices.
- According to latest report released by Ministry of Agriculture, Lentil area till date (as on 01.01.2016) was registered at 13.08 Lakh Ha which was around 12% lower than the last year in the corresponding period. Last year it was 14.85 Lakh ha. Lentil area in Uttar Pradesh has decreased from 6.09 to 4.36 Lakh ha this year due to lower rainfall.
- Higher than normal temperature in many parts of Madhya Pradesh and in parts of Indore in particular may affect normal yield of standing chana crop this year. Lower soil moisture has slowed down normal growth of plant. Rains at this stage are very crucial and it may decide the final size of the crop. According to the local source in Indore region, chana yield may drop 30-40% as compared to last year due to unfavorable weather condition so far.
- According to IBIS (provisional data), import of pulses in the week (21 Dec-27 Dec) was around 209 Thousand tonnes at major ports in India, around 21% lower than previous week's (14 Dec-20 Dec) import of 265 Thousand tonnes. Chana Green Pea, Masoor Urad, Pigeon Pea, Moong and Yellow Pea were imported lower this week whereas Cow Pea and Kidney Bean were imported higher as compared to last week.
- According to the latest Andhra Pradesh Agriculture Ministry report, pulses area is 8.04 Lakh Ha as on 23rd December, 2015 which is around 32% higher than the area of 6.43 Lakh Ha at the corresponding time of last year. Urad sowing area has increased from 1.35 Lakh Ha to 2.96 Lakh Ha whereas chana area has decreased from 4.44 Lakh ha to 3.76 Lakh Ha this year.
- According to the trade sources of Patna region in Bihar, masoor sowing area may increase by 15-20% this year as compare to last year. Farmers in this region are not dependent on rain as they are supplying water to their field through pipelines. Overall weather condition is good and flowering stage is expected from mid January.
- In order to create buffer stock of pulses, FCI and NAFED have set up procurement centers. FCI will make centers at district and taluk levels in Bidar, Yadgir and Richur whereas NAFED in Gulbarga. According to a government official, government agencies will directly purchase the pulses without charging any service charge, commission agent's cut, market cess or the handling charges.
- With prevailing higher prices and lower availability of stock of lentil in domestic market import has been on the rise in recent months. India has imported 1.34 lakh tonne lentil during last two weeks of December up to 13th, December-2015. Against this India had imported only 0.77 Lakh tonnes lentil in whole of December-2014. Traders are also covering their short position at this point of time because prices of lentil in Canada is expected to go up from current level and import may be costly in the months ahead.

**Pulses International Fundamental:**

- **USDA's Commodity Credit Corporation released purchase tender** for 14,360 metric tonne (MT) of pulses for January -February shipment as food aid. Pulses have to be in packed in 50 kg bags.
- **Demand for Canadian lentil has been on the rise in recent weeks** and its reflections are being seen on bidding prices. Cash bid for Canadian lentil has been moving northward and has reached at Canadian \$ 1233 per tonne in the last week of November. The main reasons for rising prices are mainly attributed to, improved demand, weak local currency and hope for uptrend to continue.
- **According to the trade sources, Burmese Tur crop** is in good condition and they are estimating around 3-3.5 Lakh MT productions this year. Buyers are asking \$1275(CNF) for January-February contract.
- **According to the local trader in Yangon, Urad stocks** at present may be around 3-4 thousand tones. At present contracts are at \$1825-1835 (FOB) for Fair Average Quality (FAQ).
- **According to the latest Winnipeg report, Canada Lentil Production for 2015-16** is expected to increase by around 9 percent to 2.162 MMT. Canada had produced 1.987 MMT last year. Due to higher production, exports are forecasted to reach 2.2 MMT in 2015-16 from 2.18 MMT last year. Grower's bids are forecasted to be in the price range of \$780-\$810 for all lentils in 2015-16 due to better prospects of export demand. Lentil prices were ruling \$585 (average) per tonne in the last season.
- **According to the latest Winnipeg report, Canada Peas Production for 2015-16 is expected to decrease** by around 17 percent to 3.15 MMT. Canada had produced 3.81 MMT last year. Due to lower production, exports are forecasted to reach 2.9 MMT this year from 3.09 last year and ending stock are forecasted to reach from 4.29 MMT last year to 1 MMT this year. Lower production and resultantly lower carryout would push local farmers bid maximum to \$325 per tonne.
- **Canada Chickpea Production for 2015-16 is expected to decrease by around 20 percent** to 1.05 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 85,000 MT this year from 80,000 last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.09 MMT .Farmers bids are likely to increase from \$515 to \$600-625 per tonne.
- **According to the latest ABARES report, Australian Chickpea production forecast 2015-16** is 990 kilo tonnes which are around 78% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
