

Pulses Domestic Fundamentals:

- According to IBIS (provisional data), import of pulses in the week (22 Feb-28 Feb) was around 68 Thousand tonnes at major ports in India, around 16% higher than previous week's (15 Feb-21 Feb) import of 59 Thousand tonnes. Cow Pea and Moong were imported lower this week whereas Masoor, Kidney Bean, Pigeon Pea, Chana, Green Pea, Urad and Yellow Pea were imported higher as compared to last week.
- Recent showers of rain in chana growing belt of MP may slow down harvesting activities by 3-4 days. The fear of hailstorms and rough weather this week as forecasted by IMD may hamper mature standing crop if rains occur with hailstorm. There is no report of any damage from recent rains. If rain continues harvesting of chana crop may get delay by couple of week and it may support cash market once again.
- Despite decreasing Arrival in tur market of Gulbarga prices stay steady as demand is lower at this point of time. Market participants expect prices to come down slightly from current level as quotes in International market has decreased. Millers are engaged in fulfilling their short term requirement. In brief Tur market is expected to stay steady to slightly lower in short term. However, if export quotes get firmer market might move up from current level.
- According to local trader of Jhansi region in Uttar Pradesh, pea sowing area is 20-30 % lower than last year due to lower rainfall. Arrivals of new pea crop are expected in mid March. Overall crop condition is good. At present arrivals in Jhansi mandi is in the range of 200-300 bags per day with price range of Rs 2500-2600 per bag.

Crop condition is considered better than last year and farmers are expecting greater yield than last year. Arrival in the mandis may start from mid March keeping pressure on the prices.
- According to local trader of Dewas region of Madhya Pradesh, new chana crop quality is good. Kantewala chana production this year may be lower as compare to last year due to lower area coverage. Arrivals are in the range of 200-300 bags per day with price range of Rs 4000-4200 per bag.
- According to the local trader of Ganj Basoda region of Madhya Pradesh, new chana started hitting the market in small quantity. Grain quality and size is normal to good. Now arrivals of chana will continue in small quantity till 1st week of March when harvesting of irrigated land will start and arrival will take pace. Overall crop condition is good.
- Department of Agriculture has revised down Tur production estimate to 2.55 MMT from targeted estimate of 3.67 MMT. Despite higher coverage area, tur production has been lowered down due to lower yield expectation. Agriwatch Tur production estimate is around 2.49 MMT.
- According to the Second Advance Estimate by Government, Gram production estimate has been revised down to 8.09 MMT from targeted estimate of 9.50 MMT. Gram production estimate has been lowered due to lower area coverage against higher coverage expectation. AW estimate is around 7.89 MMT, even lower by 0.20 thousand tonne from government current estimate.
- According to the latest inflation update released by Government of India, Pulses Monthly Wholesale Price Index for the month of January is 370.1 which are around 2.1 % lower than the month of December. In month of December Wholesale Price Index was 378.2.
