

Pulses Domestic Fundamentals:

- In order to create buffer stock of pulses, FCI will start procuring Chana and Lentil from next week directly from farmers at mandi rates. Government had set a target to procure one Lakh tonnes of rabi pulses, out of which 50,000 tonnes (40,000 tonnes Chana and 10,000 tonnes Lentil) was to be done by Food Corporation of India (FCI) and the remaining by Nafed and SFAC. The government agencies have already procured 51,000 tonnes of kharif pulses.
- According to local trader of Jhansi region of Uttar Pradesh, new Pea crop quality is good. At present arrivals in the mandis is around 400-500 bags per day with price range of Rs 2400-2600 per bag. Despite of new crop arrival, prices of Pea have shown some firmness due to higher export quotes from Canada and expectation of crop loss in Madhya Pradesh by recent rains. Agriwatch expects prices to take some correction due to arrival pressure.
- According to the local trader of Rajgarh region of Madhya Pradesh, recent rains has affected chana crop in few regions. Harvesting has got delayed and arrivals in the mandis have been lowered down. However, if rains continue it may damage the crop and can also affect on the quality negatively. At present arrivals in the mandi is around 500-600 bags per day with price range of Rs 4400-4450 per bag.
- Imported volume of Urad in India has increased from 0.01 Lakh tonnes in January to 0.04 tonnes in February. AW expects that import volume will increase in the month of March due to arrival of new crop in Burma and importer's increasing buying interest in anticipation of good price prospects in futures.
- According to IBIS (provisional data), import of pulses in the week (22 Feb-28 Feb) was around 60 Thousand tonnes at major ports in India, around 13% lower than previous week's (22 Feb-28 Feb) import of 68 Thousand tonnes. Chana, Cow Pea, Kidney Bean, Masoor and Urad were imported lower this week whereas Moong, Pigeon Pea, Green Pea and Yellow Pea were imported higher as compared to last week.
- Recent showers of rains and hailstorm have affected chana crop in Gwalior region of Madhya Pradesh. Harvesting may be get delayed by week. It may continue to lend support to cash market. Other rabi crop like peas too has been affected negatively.
- India Tur imported around 0.184 Lakh tonnes in February which is around 3 percent higher than January. In January India imported 0.179 Lakh tones. With slowing down of arrivals and improving local price Agriwatch expects import volume to increase in a span of time. At present Lemon Tur from Burma is quoted at \$1130-1150 CNF per tones.
- Tur arrival pace has decreased as expected last month. The pace of current arrival has come down to 600/700 bags per day in Gulburga. Farmers have retained their stock in expectation of higher price. They would prefer to release stock when prices get firmer.
- With improving prices and decreased arrivals buyers have started replenishing their Tur stock requirement and their fresh buying spree has lent support to cash market. Fresh demand from stockiest may remain supportive to the cash market fundamental.
- According to the local trader of Bina region of Madhya Pradesh, new masoor started hitting the market in small quantity. Quality and size of grain is good. At present arrivals are in the range of 100-150 bags per day with price range of Rs 4500-4700 per bag.
- Harvesting of Masoor crop in Patna region of Bihar have started and crop is expected to hit the market in mid March. Crop is in very good condition and farmers are expecting 30 % greater yield than last year. Masoor sowing area is higher by around 20% this year compared to last year.
- Recent showers of rain in chana growing belt of MP may slow down harvesting activities by 3-4 days .The fear of hailstorms and rough weather this week as forecasted by IMD may hamper mature standing crop if rains occur with hailstorm. There is no report of any damage from recent rains. If rain continues harvesting of chana crop may get delay by couple of week and it may support cash market once again.

Pulses International Fundamental:

- According to the latest Statpub report, France pea export increased by 66% to 10.0 Thousand MT in January from previous month of 6.01 Thousand MT. However, it is 23% lower than 13,030 MT shipped during the same month last year. This year export of peas from France is expected to increase.
- According to the latest report, Canadian Lentil production for 2015-16 increases by around 19% to 2.4 MMT. Last year it was 1.98 MMT. Due to higher production and good demand, exports are forecasted to reach 2.4 MMT from 2.1 MMT. Season ending stock is expected to decrease from 0.36 MMT to 0.10 MMT. Farmer's average bids are likely to increase from \$585 to \$880/910 per tonnes due to higher demand, less availability of good quality crop and weak Canadian dollar.
- According to the latest report, Canada Chickpea Production for 2015-16 decreases by around 31 percent to 0.90 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 0.85 MMT this year from 0.80 MMT last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.075 MMT .Farmers bids are likely to increase from \$515 to \$685-715 per tonne.
- According to the latest report, Canada Pea Production for 2015-16 decreases by around 16 percent to 3.2 MMT. Canada had produced 3.8 MMT last year. Due to lower production, exports are forecasted to reach 2.95 MMT this year from 3.04 MMT last year. Farmer's bids are likely to increase from \$260 to \$305-335 per tonne due to good demand.
- According to the latest ABARES report, Australian Chickpea production forecast 2015-16 is 1013 kilo tonnes which are around 82% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
