

Pulses Domestic Fundamentals:

- With sunshine in major producing region of chana, impact of loss has been minimized .Market seems under pressure once again in expectation of higher arrivals in coming week. Fear of considerable loss for chana crop has eased now. However, if rains/hailstorms occur in chana growing belt during next two week may damage mature crop standing in the field considerably. As of now crop condition is good. Next two weeks remain crucial from production size and quality point of view. We need to have close eye on weather development for two three weeks.
- Imported tur increased by 5% to 9.95 thousand in the second week of March in comparison to first week. Higher import hints uptrend to continue in the market in coming weeks despite higher arrival in domestic markets. Good demand has lent support to market fundamentals. Farmers have preferred to release higher quantity at higher price and the flow is likely to continue as demand for tur for processing is higher than normal. Despite higher domestic arrival prices may rule firm as Burmese quotes stayed steady at \$1140 per tonne. Indian market trend follows Cnf trend for price. If Cnf quotes rules higher, domestic price too would follow the trend.
- According to the local trader of Kanpur region of Uttar Pradesh, new pea crop start hitting the mandi. Moisture level is around 15-16 % and crop quality is normal. Traders expect this year yield to be lower than last year. At present arrival in the mandi are around 2000 bags per day with price range of Rs 2900-2925 per bag.
- According to the local trader of Patna region of Bihar, new masoor start hitting the market in small amount. Size of the grain is greater than last year and moisture level is 4-5 %.Overall crop quality is good. Due to the favorable weather condition yield per acre is around 12-15 quintal per acre this year as compared to 7-8 quintal per acre last year. At present arrival is around 100-150 bags per day with price range of Rs 5400-5500 per bag.
- According to IBIS (provisional data), import of pulses in the week (07 Mar-13 Mar) was around 53 Thousand tonnes at major ports in India, around 11% lower than previous week's (29 Feb-06 Mar) import of 60 Thousand tonnes. Chana, Cow Pea, Kidney Bean, Masoor and Urad were imported lower this week whereas Moong, Pigeon Pea, Green Pea and Yellow Pea were imported higher as compared to last week.
- The WPI has fallen from 370.1 in January 2016 to 356.4 in February 2016 for pulses. There has been a considerable fall in WPI of Lentil (347.1 for January 2016 and 337.2 for February 2016) and Moong (413.6 for January 2016 and 397.4 for February 2016), whereas the fall in WPI of urad has been marginal (507.8 for January 2016 and 507.1 for February 2016).
- In order to create buffer stock of pulses, FCI will start procuring Chana and Lentil from next week directly from farmers at mandi rates. Government had set a target to procure one Lakh tonnes of rabi pulses, out of which 50,000 tonnes (40,000 tonnes Chana and 10,000 tonnes Lentil) was to be done by Food Corporation of India (FCI) and the remaining by Nafed and SFAC. The government agencies have already procured 51,000 tonnes of kharif pulses.
- According to local trader of Jhansi region of Uttar Pradesh, new Pea crop quality is good. At present arrivals in the mandis is around 400-500 bags per day with price range of Rs 2400-2600 per bag. Despite of new crop arrival, prices of Pea have shown some firmness due to higher export quotes from Canada and expectation of crop loss in Madhya Pradesh by recent rains. Agriwatch expects prices to take some correction due to arrival pressure.
- According to the local trader of Rajgarh region of Madhya Pradesh, recent rains has affected chana crop in few regions. Harvesting has got delayed and arrivals in the mandis have been lowered down. However, if rains continue it may damage the crop and can also affect on the quality negatively. At present arrivals in the mandi is around 500-600 bags per day with price range of Rs 4400-4450 per bag.
- Imported volume of Urad in India has increased from 0.01 Lakh tonnes in January to 0.04 tonnes in February. AW expects that import volume will increase in the month of March due to arrival of new crop in Burma and importer's increasing buying interest in anticipation of good price prospects in futures.

Pulses International Fundamental:

- **According to latest Canadian update**, exports for chickpeas are expected to increase from 2014-15 because of increase in demand from Pakistan and US. USDA has estimated US chickpea production at 114 kilotonnes, which is about 10% lower than 2014-15. The average prices can also increase due to higher local demand and higher quotes in international market.
- **According to the latest Statpub report, France pea export increased by 66%** to 10.0 Thousand MT in January from previous month of 6.01 Thousand MT. However, it is 23% lower than 13,030 MT shipped during the same month last year. This year export of peas from France is expected to increase.
- **According to the latest report, Canadian Lentil production for 2015-16 increases by around 19%** to 2.4 MMT. Last year it was 1.98 MMT. Due to higher production and good demand, exports are forecasted to reach 2.4 MMT from 2.1 MMT. Season ending stock is expected to decrease from 0.36 MMT to 0.10 MMT. Farmer's average bids are likely to increase from \$585 to \$880/910 per tonnes due to higher demand, less availability of good quality crop and weak Canadian dollar.
- **According to the latest report, Canada Chickpea Production for 2015-16 decreases by around 31 percent** to 0.90 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 0.85 MMT this year from 0.80 MMT last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.075 MMT. Farmers bids are likely to increase from \$515 to \$685-715 per tonne.
- **According to the latest report, Canada Pea Production for 2015-16 decreases by around 16 percent** to 3.2 MMT. Canada had produced 3.8 MMT last year. Due to lower production, exports are forecasted to reach 2.95 MMT this year from 3.04 MMT last year. Farmer's bids are likely to increase from \$260 to \$305-335 per tonne due to good demand.
- **According to the latest ABARES report, Australian Chickpea production forecast 2015-16** is 1013 kilo tonnes which are around 82% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to Agri Market experts**, Burma pigeon peas are being offered at USD 1140 CFR Mumbai for April shipment.
