

Pulses Domestic Fundamentals:

- According to IBIS (provisional data), import of pulses in the week (14 Mar-20 Mar) was around 78 Thousand tonnes at major ports in India, around 48% higher than previous week's (07 Mar-13 Mar) import of 53 Thousand tonnes. Cow Pea, Kidney Bean, Masoor and Pigeon Pea were imported lower this week whereas Chana, Moong, Urad Green Pea and Yellow Pea were imported higher as compared to last week.
- In order to create buffer stock of pulses, HAFED will Procure Chana on behalf of NAFED in Haryana. Haryana gram production estimate is around 1.05 Lakh tonnes and arrivals are expected from mid April. If prices decreases or comes around MSP, government would buy Chana paying Rs 75 per quintal over and above MSP.
- New Urad from Burma starts reaching India in small quantity. At present Cnf prices are very high and are in the range of \$1300-1320 at Chennai port. AW expects import quantity to increase in near future and prices to show some weakness.
- According to the local trader of Bina region of Madhya Pradesh, Quality of new masoor is good and grain size is normal. At present arrivals are in the range of 250-300 bags per day with price range of Rs 4900-5000 per bag.
- The WPI has fallen from 370.1 in January 2016 to 356.4 in February 2016 for pulses. There has been a considerable fall in WPI of Lentil (347.1 for January 2016 and 337.2 for February 2016) and Moong (413.6 for January 2016 and 397.4 for February 2016), whereas the fall in WPI of urad has been marginal (507.8 for January 2016 and 507.1 for February 2016).
- Imported tur increased by 5% to 9.95 thousand in the second week of March in comparison to first week. Higher import hints uptrend to continue in the market in coming weeks despite higher arrival in domestic markets. Good demand has lent support to market fundamentals. Farmers have preferred to release higher quantity at higher price and the flow is likely to continue as demand for tur for processing is higher than normal. Despite higher domestic arrival prices may rule firm as Burmese quotes stayed steady at \$1140 per tonne. Indian market trend follows Cnf trend for price. If Cnf quotes rules higher, domestic price too would follow the trend.
- According to the local trader of Kanpur region of Uttar Pradesh, new pea crop start hitting the mandi. Moisture level is around 15-16 % and crop quality is normal. Traders expect this year yield to be lower than last year. At present arrival in the mandi are around 2000 bags per day with price range of Rs 2900-2925 per bag.
- According to the local trader of Patna region of Bihar, new masoor start hitting the market in small amount. Size of the grain is greater than last year and moisture level is 4-5 %. Overall crop quality is good. Due to the favorable weather condition yield per acre is around 12-15 quintal per acre this year as compared to 7-8 quintal per acre last year. At present arrival is around 100-150 bags per day with price range of Rs 5400-5500 per bag.
- In order to create buffer stock of pulses, FCI will start procuring Chana and Lentil from next week directly from farmers at mandi rates. Government had set a target to procure one Lakh tonnes of rabi pulses, out of which 50,000 tonnes (40,000 tonnes Chana and 10,000 tonnes Lentil) was to be done by Food Corporation of India (FCI) and the remaining by Nafed and SFAC. The government agencies have already procured 51,000 tonnes of kharif pulses.
- According to local trader of Jhansi region of Uttar Pradesh, new Pea crop quality is good. At present arrivals in the mandis is around 400-500 bags per day with price range of Rs 2400-2600 per bag. Despite of new crop arrival, prices of Pea have shown some firmness due to higher export quotes from Canada and expectation of crop loss in Madhya Pradesh by recent rains. Agriwatch expects prices to take some correction due to arrival pressure.

Pulses International Fundamental:

- **According to latest update**, carry-out stocks for Canadian Chickpeas are expected to fall from 125 thousand MT in 2014-15 to 50 thousand MT 2015-16. This fall in carry-out stocks is mainly due to increased exports and decreased production
- **According to Agri Market experts**, Burma pigeon peas are being offered at USD 1140 CFR Mumbai for April shipment. Traders are offering Green mung Beans from Argentina at USD 980-1000 CFR Nhava Sheva for May/June shipment and Kabuli Chickpeas 9 MM from Argentina is being offered at USD 960 CFR Nhava Sheva for April shipment.
- **According to the latest Statpub report, France pea export increased by 66%** to 10.0 Thousand MT in January from previous month of 6.01 Thousand MT. However, it is 23% lower than 13,030 MT shipped during the same month last year. This year export of peas from France is expected to increase.
- **According to the latest report, Canadian Lentil production for 2015-16 increases by around 19%** to 2.4 MMT. Last year it was 1.98 MMT. Due to higher production and good demand, exports are forecasted to reach 2.4 MMT from 2.1 MMT. Season ending stock is expected to decrease from 0.36 MMT to 0.10 MMT. Farmer's average bids are likely to increase from \$585 to \$880/910 per tonnes due to higher demand, less availability of good quality crop and weak Canadian dollar.
- **According to the latest report, Canada Chickpea Production for 2015-16 decreases by around 31 percent** to 0.90 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 0.85 MMT this year from 0.80 MMT last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.075 MMT. Farmers bids are likely to increase from \$515 to \$685-715 per tonne.
- **According to the latest report, Canada Pea Production for 2015-16 decreases by around 16 percent** to 3.2 MMT. Canada had produced 3.8 MMT last year. Due to lower production, exports are forecasted to reach 2.95 MMT this year from 3.04 MMT last year. Farmer's bids are likely to increase from \$260 to \$305-335 per tonne due to good demand.
- **According to the latest ABARES report, Australian Chickpea production forecast 2015-16** is 1013 kilo tonnes which are around 82% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to latest Canadian update**, for 2016-17 sowing area for lentils in Canada is expected to increase up to 1.8Mha. Furthermore, higher yield is also expected which will lead to increase in production by 20% to 2.85 Mt which is up by 0.57Mt in 2015-16.
- **According to latest Canadian update**, exports for chickpeas are expected to increase from 2014-15 because of increase in demand from Pakistan and US. USDA has estimated US chickpea production at 114 kilotonnes, which is about 10% lower than 2014-15. The average prices can also increase due to higher local demand and higher quotes in international market.
