The presence of Salmonella bacteria on pepper is still the biggest obstacle for the Brazilian pepper industry, especially the European Union (EU). Therefore, some sources believe that Brazil has exported pepper to Vietnam and India, countries with the most modern pepper sterilization technology in the world for further processing before re-exporting it back to Europe and other countries.
- Currently, Brazil is entering the pepper harvest, output is expected to increase by 10% compared to 2021 to 98,000 tons in 2022. Indian pepper production is expected to increase slightly.
