

### BLACK PEPPER

#### Fundamentals:

#### Today's Update:

- Steady to firm sentiment was witnessed in Black pepper spot markets on Thursday.
- Sources suggest that pepper production in Vietnam has drastically reduced due to the decline in planting areas and crop losses. As a result, stockists are hoarding the remaining pepper stocks, expecting the prices to surge. Additionally, they are anticipating a surge in demand from China in the forthcoming days.

#### Previous Update:

- As per the Vietnam Pepper Association (VPA), approximately 70% of the pepper farming areas in Vietnam have already been harvested by mid-March 2023. Despite this, both planters and stockists are holding onto their pepper stocks instead of selling them immediately, as they anticipate higher prices in the near future. Some are only selling their stocks to meet their basic requirements.
- As per current situation, AgriWatch expects India's pepper production for 2022-23 likely to be around 52,000 to 53,000 MT. Last year production was 57,000 to 58,000 MT.
