

Castor Domestic Fundamentals:

- Castor seed markets traded firm on Wednesday on fresh buying activities in Gujarat,Rajasthan. However it traded steady in Andhra Pradesh. Arrivals in major markets like Sumerpur, Rajkot and Deesa have improved slightly. Two major players are buying seed actively and one of them is Rucchi.In Deesa market Seed price improved from Rs 4125 to Rs 4150 per qtl.it gained Rs 20 per qtl in Patan to Rs 4125 per qtl.
- Castor seed farmers in Gujarat want MSP for this crop like other crops in India. They complain that prices in open market are not remunerative for farmers and their interest to grow castor crop is diminishing fast. That's why area under this crop is declining and market and domestic commercial industry is on the brink of facing short supply of castor seed this year.
- This year area under castor seed decreased sharply from 11.1 lakh ha. to 9.84 lakh ha, almost 1.97 lakh ha. lower than 2012-13. Considerable decrease in area has been seen in Gujarat and Andhra Pradesh. Total area collectively in both states is lower by 1.58 lakh ha.It is going to impact the final size of the crop to near 12 lakh T against the last year production of around 14 lakh T.
- Lower area and production is likely to fuel cash market after April. Demand for oil is good and going by current export trend and domestic consumption there is a visible short supply in the cash market.\$ to 5 lakh tonne stock is expected to remain in strong hands and market may move as per their strategy, traders opine.

International Market Update

- Major importers of castor oil are buying only to fulfil their immediate requirement.They would start fresh buying during peak arrival season in March. By the time price of castor seed is expected to stabilize near Rs3800 to 3900 per qtl.
- China, France, European Union and Australia remain the major buyers for Indian castor oil. However, sudden spike in futures market has sidelined importers and castor oil demand has come down considerably.
- Castor oil is being exported from India at \$1250 to\$1260 per T while Rotterdam quotes \$1550 per T.This means Indian exporters have opportunity to get more price in the international market. it would support cash market once again in the medium term.
