

Castor Domestic Fundamentals:

- **Cash market traded firm on Wednesday due to restricted arrivals from last three-four days.** Recent rains have impacted normal trading activities in Rajasthan. With opening up of weather market may witness improved level of arrivals. Prices of castor seed improved in all major markets except Deesa where it is being traded at Rs 4050 poer qtl.It is lower by Rs 3000 per qtl from last week.
- **Agriwatch estimates 11.49 lakh tonne seed production in 2013-14 against 14.04 lakh tonne** last year. As per Agriwatch estimate the season started with 3.84 lakh tonne carry out.
- **Thus total availability comes to 15.33 lakh tonne.**At 46 percent oil recovery the total oil availability would be around 7.00 lakh tonne against the expected total global and domestic demand of 7.5 lakh tonne of oil. It clearly indicates short supply in the medium term.
- **Govt has released second adv. estimate of foodgrains** production for 2013-14 on 14, Feb, 2014. Market participants are surprised to see the inflated figure of castor seed production this year. Govt. has estimated 16.46 lakh tonne castor seed production this year against the set target of 15.81 lakh tonne. Market expert see production at around 11 lakh tonne.
- **Market participants expect more decline as** peak arrival season (March-April) is not far away from now. However, any steep dip from current level is unlikely as market is well aware of lower crop size this year. Market is expected to stabilize In the range of Rs 3650 to Rs 3900 per qtl depending on quality and marketing centers of the seed.
- **Castor seed farmers in Gujarat want MSP for this crop like** other crops in India. They complain that prices in open market are not remunerative for farmers and their interest to grow castor crop is diminishing fast. That's why area under this crop has decreased this year.
- **This year area under castor seed decreased sharply from 11.1 lakh ha. to 9.84 lakh ha,** almost 1.97 lakh ha. lower than 2012-13. Considerable decrease in area has been seen in Gujarat and Andhra Pradesh. Total area collectively in both states is lower by 1.58 lakh ha. It is going to impact the final size of the crop to near 12 lakh T against the last year production of around 14 lakh T.

International Market Update:

- **Castor derivatives volume too is expected to go up from 1.2 lakh tonne** to 1.25 lakh tonne. China would continue to maintain its previous position as major importer. Its import volume may go up from 2.11 lakh tonne (2013) to 2.35 lakh tonne in 2014. Europe would remain second next to China with expected import of 1.45 lakh tonne in 2014. It had exported 1.3 lakh tonne in 2013.
- **Major importers of castor oil are buying only to fulfil** their immediate requirements. They would start fresh buying during peak arrival season in March as they expect correction in the market in the near term. By the time price of castor seed is expected to stabilize near Rs3700 to 3800 per qtl.

Domestic market Outlook:

- **Castor seed market is likely to trade steady to slightly firm.**
