

### Castor Domestic Fundamentals:

- **Cash market trades mixed on Wednesday with some buying support at lower level.** Overall sentiments remain weak as arrivals from new crop is expected to pick up by mid Feb. Planters may start buying around 3900 per qtl. Any steep fall from current level is unlikely as farmers would prefer to retain stock in case price goes down below 3900. They have option to sell cumin and mustard which are ruling higher at this point of time.
- **Stock is said to be more than assumed trade estimate. Total stock** of seed could be over 6.5 lakh tones at this point of time. Market experts assume that this year total crushing up to December has not been more than 9.5 lakh tones as export demand for oil was seen lower than normal expectation. Despite various estimates of lower crop size ranging from 12.5 to 14.5 lakh tonne, outlook remains bearish for seed in the medium term. Arrivals in various markets of Gujarat have increased in the month of January and would continue to increase till April. Major portion of arrivals in mandis are from old crop.
- **Last week total meal export was registered at 3037 tonne**, lower by 7 percent than second week volume. It is being traded at Rs 7700 per tonne at this point of time.
- **FOB quote at Kandla decreased considerably from \$1440** per tonne to \$1410 per tonne during the week under review. It is likely to rule in the range of \$1390 to \$1400 in the month of February. Demand from China, EU, US and Japan is expected to remain weak till January and February. Major players would buy only need based buying until arrival gets its peak. We expect peak up in arrivals from Mid March.
- **Castor seed in Gujarat decreased by 3.91 percent in comparison to last week** from Rs 44750 to Rs 43000 per tonne. However, it is higher by 1.28 percent from the price realised on Jan 2014. Castor meal in bulk volume for export at Kandla is being quoted at \$132 per tonne. It is 23.36 percent higher than price realised on Jan-2014. It is traded at Rs 7700 per tonne at Kandla.

### International Market Update:

- **Some fresh inquiry has been reported at \$1410 per tonne** for castor oil at Kandla Port. Buyers are interested to buy at \$1400 per tonne. As seed is under pressure dip in oil price seems to be on card.
- **Castor meal demand is likely to decrease further as prices are ruling higher.** It is being traded at \$133 per tonne at Kandla. Only need based buying is on the card. Bulk buying is expected in March – April, the peak arrival season and likely lower price.

**Domestic market Outlook:** Market is likely to trade steady to slightly weak.
