

Castor Domestic Fundamentals:

- **Castor seed cash markets were closed on Saturday.**
- **Castor seed cash market continued to reel under pressure despite reports** of higher export demand. Sluggish trading activities continued at the fag end of FY ending. Fresh trading activities are expected from the second week of April. Overall sentiments in the market remain bearish. Half of the major markets remained closed.
- **Besides, stockists too would try to drag market down as much as possible** to buy at lower level. Market participants should start buying around Rs3300/3400 for stock purpose. Gains in market are expected in the second half of the year.
- **Market expert says that China has covered 85 percent of its annual need(1.8 lakh tonne),**EU and US too have covered 80 percent of their need so far.EU and US annual need is expected to be 1.20 and 0.60 lakh tonne respectively. Demand from other countries is likely to improve in the month of April as buyers are waiting for higher arrivals
- **Heavy burden of carryout is said to be exhausted by 40 percent till now and pipe line is almost vaccant.**So any major dip from current level is unlikely. Demand from oil from national and international market has improved and it may support market even at peak arrival month (April).So the best time for seed buying is expected to be April.
- **Stability in the market is expected by mid April. May onward sowing intention of the farmer would** be clear. Monsoon rains and price of the seed would be crucial for this year's acerage.Lower price and monsoon rains would decide the future course of price trend.
- **Castor Oil FoB Kandla was traded at \$1190 per tonne last** week and no major improvement is expected in the remaining month of March/April. During last one week it has decreased from\$1200 to \$1190 per tonne, almost \$10 lower than the price prevailing in the third week of March. In Feb 2014 it was ruling at \$1355 per tonne, higher by 12.88 percent from from Feb 2015 price.

International Market Update:

- **Major international buyers are out of the market and they may enter into** the market by mid-April,bythen market is expected to get stabilized.
- **Not much trading activities is expected in global market this week too and** major buyers would remain busy with March closing. Fresh trading activities are expected by the second week of April. Continuous banking holidays too would keep trading activities at negligible level
- **The weak economic scenario in China and Europe has reflected** in castor oil export volume in 2014. China imported 24 percent lower oil in 2014 in comparison to 2013.However, good news is that improvement by 15 percent is expected now.
- **Castor oil in Rotterdam decreased from \$1700 to \$1525 per tonne in last** one month and may touch \$1500 per tonne in the month of March. Pressure on Indian market and decreasing trend continue to impact global market in the weeks ahead.

Domestic market Outlook: Market is likely to trade steady to weak.
