

**Domestic Market Update:**

- **Government orders to investigate heavy lifting in castor seed in NCDX; In view of the difficulties in NCDX, BSC has made** 03 new contracts available for trading in castors, whose delivery center will be Patan {Gujarat}. Castor seed prices fell again in last couple of day's trading session. For the last few days or so, in only 7 trading sessions, castor seed has dropped 30 percent from its upper level. On the other hand, on the day when the castor seed futures were launched on the BSE, the purchase of castors on NCDEX was seen, but yesterday once again on the third trading day of the week, the castor has started the reverse. In such a situation, traders say that the exchange changed the rules repeatedly, imposed margins and then removed, which created a panic situation in the market, which broke the price and also had an impact on the spot business. It has caused a huge loss to businessmen and farmers. They say that if they estimate, there is a loss of about 500-600 crores. The traders have accused the officials of the exchange of collusion.
- **On the other hand "this year the area of castor seed is higher than last year and good rain is expected to be a bumper crop in the** country's largest castor seed producing state Gujarat in the last round of monsoon season. There is also a reason that selling pressure has increased. "According to the recent report of the Union Ministry of Agriculture, the acreage of castor seed nationwide is 9.36 lakh hectares this year, which is seven per cent higher than last year's acreage of 8.77 lakh hectares.
- **Despite the imposition of special 20 per cent margin on short position, prices are moving downwards due** to technical selling. Some brokers had failed to pay additional mark-to-market margins after downward movement in October-December contracts over three trading sessions, compelling the exchange's clearing house to use these traders' collaterals to settle their pay-out obligations.
- **However, according to the market participants, at present all India castor stock is lower than the average** stocks which might give support to the falling prices.
- **As per the Ministry of Agriculture, current Kharif castor acreage as on 27<sup>th</sup> September 2019 up by 6.96 per cent** at 9.38 lakh hectares as compared to 8.77 lakh hectares last year same period. Andhra Pradesh, Telangana, Haryana and Rajasthan castor area is down from last year on the other hand major producing state Gujarat area under castor seed up by 34.48% to 7.02 lakh hectares till date.
- **Cash Castor oil and seed markets dropped on Friday due to speculation in future markets.** All India castor seed arrival today is 348 quintals which is down by 276 quintals from last day arrival of 624 quintals.
- **Banaskantha, Patan, Mehsana, Sabarkantha, Gandhinagar and Aravalli in north Gujarat region account for 3.51 lh** of castor acreage this season. That is more than half of the entire crop area in the state. Kutch region, which is a single district but have geographical features distinct from other regions of the state, is second with 1.33 lh under castor cultivation this year. With 1.03 lh, Saurashtra, the region formed by 11 districts, is third. Patan has emerged as the single largest castor district with farmers having sown this long-duration crop in 94,800 hectare. It is followed by Banaskantha with 93,300 ha and Mehsana (87,100 ha). Surendranagar in Saurashtra has reported castor sowing in 69,700 ha, the fourth highest in the state. Morbi (22,900 ha) is the other Saurashtra district which has seen significant sowing of the oilseed.
- **As per the Solvent Extractors' Association of India (SEA), all India castor seed production estimate for 2018-19 is 11.27** Lakh MT which is 21.35 per cent lower than the 2017-18 production estimate of 14.33 Lakh MT. However, according to the AGCON, castor production estimate is 9.13 Lakh MT for 2018-19.
