

Domestic Market Update:

- Firm sentiments recorded in castor seed price on Saturday all India castor seed arrival is 20573 quintal which is up by 2952 quintal from last day arrival of 17701 quintal.
- Fundamentally for the coming month, it is expecting that NCDEX Castor seed futures to trade bullish as the current year (2020-21) sowing acreage is estimated to be lower compared to the previous year by 8-10 percent in Gujarat and Rajasthan. So far, the sowing has begun only in Telangana and peak sowing in Gujarat and Rajasthan is expected to pick up by July 15 onwards.
- As Per the final estimates, castor output in the country will be lower by about 15,000 tons from 19.77 lakh tons reported in 2018-19.
- The latest data of Gujarat sowing shows that total acreage under the castor crops stands at 1900 hectares as on 06th July 2020. From this it is clear that Castor acreage is likely getting affected as farmers prefer more of other crops.
- India's average castor seed productivity after the third and fourth survey has been revised down to 1,977 kg per hectare against 2,052 kg/ha estimated in the first estimate. This is due to some crop damage in Gujarat from untimely rains and strong winds. However, Rajasthan crop conditions were a little better than the first estimate.
- According to sowing data released by Ministry of Agriculture, India, Acreage under castor seed is 9.92 lakh hectares.
- Gujarat will continue to be the largest castor seed producer with an estimated output of 16.60 lakh tons or nearly 85 per cent of the country's output. The first estimate had put the Gujarat output at 17.44 lakh tons.
- Strong winds, rains and hailstorm in some tehsils of Banaskantha, Gandhinagar, Mehsana and Ahmedabad (districts) during March 2020 had slightly damaged the standing castor crop. Farmers have also gone slow on selling castor seed in the market primarily due to the lockdown and lower prices.
- Rajasthan, on the other hand, is set to see an improvement in the average yield, which is revised upward to 1,593 kg/ha after the fourth round of survey, as against the first estimate of 1,523 kg/ha, due to favorable weather conditions and availability of water for irrigation.
- Also the area under castor in Rajasthan is believed to be higher for 2019-20 at 1, 54,240 hectares per government estimates over last year's 1, 38,000 hectares. Meanwhile final production for the State is estimated to be 2.46 lakh tonnes as against the first estimate of 2.35 lakh tonnes.
