Castor Seed &Oil Monthly Research Report

Contents

Outlook and Review -Domestic Front:

Monthly average castor seed price traded weak in January with higher arrival as participants unsettled positions in modify with a firm trend at the physical market. Firm in castor seed prices was mostly attributed to offloading of positions by speculators due to a weak trend at the spot markets due to withdrawal of support from consuming industries.

Overall 10% of the area under castor seed cultivation is up in Rajasthan in 2017 compared to 2016. Sirohi and Jalore have marked a jump of 20% and 11% in area under castor seed cultivation in 2017 compared to the previous season. The planting in these districts extended upto September 2017. This is primarily due to the crop damage sown before castor, due heavy rains this season, in the catchment area in both the districts near Mount Abu. However, it has declined by 13% in Barmer on crop rotation, less availability of water for irrigation.

According to the Solvent Extractors' Association of India (SEA), Castor seed production in 2016/17 is expected to stand down by around 25% to 10.55 lakh tons compared to 14 lakh tonss in previous year. While, castor seed production for 2016/17 is placed down at 15.54 lakh tonss against previous year record i.e. 17.52 lakh tons as per the second advance estimates by the ministry of agriculture department.

Acreage over Gujarat is expected to increase by 2% due to shift in acreage from Potato in Deesa belts. In Rajasthan and South India acreage is likely to drop by 2% & 12.2% respectively as farmers are opting for Groundnut. Production for the next season is expected at 10.86 lakh tons basis last five year average yields.

This year preliminary Agriwatch estimate for 2017/18 shows 10. 67 lakh tonne production based on farmers feedback and initial field survey in Gujarat, Rajasthan and AP. Area in Gujarat is likely to decline by over 20 % from 6.20 to 4.96 lakh ha. Overall decline in Rajasthan may be 5% and area would decline from 2.30 to 1.84 lakh ha. In AP / Telangana it may decline by 20 percent to 1.06 lakh ha. As weather remains favorable Agriwatch expects normal yield this year. Based on normal yield seed production may decline to 10.67 lakh tonne given the normal weather condition. Agriwatch would revise preliminary estimate in November-2017.

Seed Supply & Demand:

Agriwatch Preliminary estimates regarding area and production shows around 16 percent lower acreage this year due to crop shifting from castor seed to other lucrative crops. Over all area would decline from 11.21(normal) to 9.43 lakh ha this year. The estimate is based on initial ground level survey and feedback received from farmers. Agriwatch expects above normal rainfall this year and hopes normal yield too. Based on normal yield realization seed production would decline from 15.12 to 12.94 lakh tons this year.

This season started with 5.35 lakh tons as carryout and thus total availability for current MY - 2016-17comes to 15.85 lakh tons it estimated production of 10.5 lakh tons for MY-2017-18 is included. Lower production would drag carryout down from 5.35 to 0.35 lakh tons. It would push seed price up in second and third quarter.
