

Castor Domestic Fundamentals: -

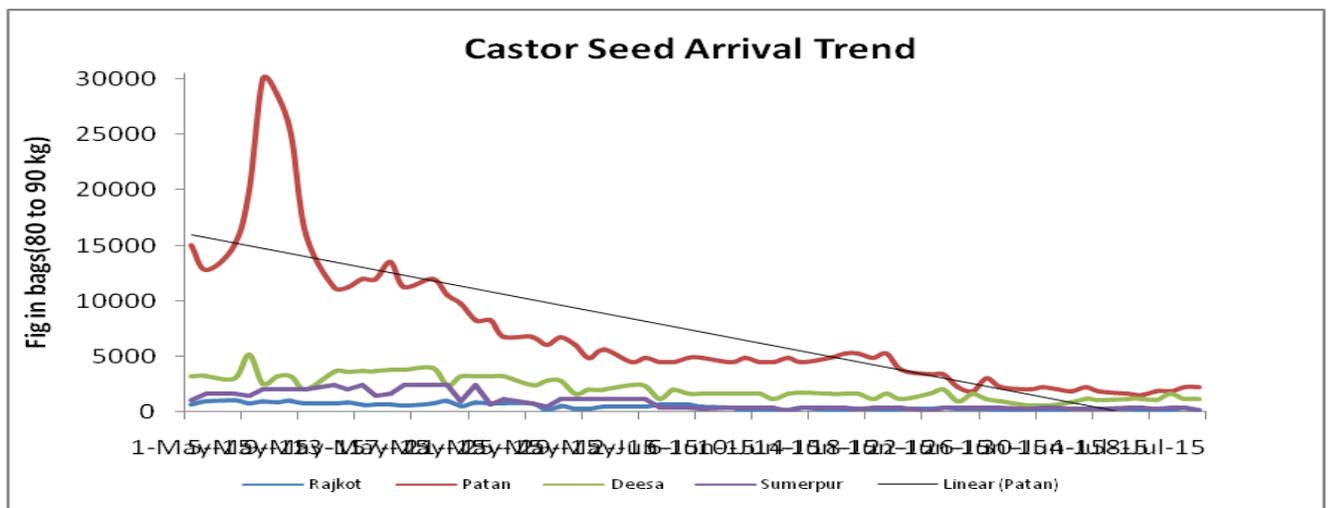

- Castor seed market continued to trade lower during the week under review. Planters were seen idle amid weak inner tone and sluggish demand from overseas buyers for oil. Good sowing conditions in Gujarat, Rajasthan and A.P have impacted inner tone negatively. It is expected to trade lower in the weeks ahead too. Sowing would pick up from mid July in Gujarat followed by Rajasthan. Area coverage during Kharif 2015 is higher by 0.08 lakh ha compared to corresponding period of Kharif 2014.
- At arrival front, considerable decline has been seen in all major markets during the first week of July. Total arrivals in Gujarat and Rajasthan declined from 54500 Qtl to 47350 Qtl in last one week. With declining prices, arrivals are bound to decline in the weeks ahead. Farmers too may retain their old stock till the end of the sowing season.
- Generally, under normal weather conditions castor area coverage ranges in between 10 to 11 lakh ha on all India level. This year too it may hinge in between 10 to 10.5 lakh ha. Good rainfall in the beginning of monsoon season in castor growing belt of Gujarat may encourage farmers to shift some castor area to other cash crop like cotton and sesame to some extent. Sowing would start from next week.

It has revised castor production estimate at 18.24 lakh tonne, down by 87 thousand tonne to. In second Adv Est. Castor production was estimated at 19.11 lakh tonne. The minor decrease in third Adv . Est is mainly attributed to inclement weather and yield loss. India has produced 17.27 lakh tonne castor seed in 2013-14. Target for the year was 16.65 lakh tonne.
