Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Market Update / Highlights:

According to the IMD, a cyclonic circulation is anticipated to develop over the northwest Bay of Bengal by around July 16th, 2023. As a result of this system, a low-pressure area is likely to form in the same region within the following 2-3 days. The IMD also predicts that there will be widespread to moderate rainfall in most parts of the country, except in West Rajasthan, Andhra Pradesh, South Interior Karnataka, and Tamil Nadu, where isolated to scattered rainfall is expected.

The inadequate and uneven rainfall experienced thus far has caused concern among market participants regarding the coverage of sowing. The sowing coverage for Tur and Urad has reduced, while it remains consistent for Moong. Slow and unsatisfactory showers have caused Tur coverage to lag behind in Karnataka, while uneven rainfall distribution has resulted in lower coverage in Maharashtra. In the meantime, it is reported that the sowing window for Urad and Moong is almost closed in Karnataka due to insufficient rains with lower acreage, while Urad coverage in the major producing state of Madhya Pradesh is expected to decrease. Growers in MP have reportedly shifted their focus to more profitable crops like Groundnut, Soybean, and Maize due to significant losses incurred from Urad cultivation in the previous season, which was plagued by continuous rain and quality issues. Maharashtra is also witnessing lower coverage for major Kharif crops, including Tur, Moong, and Urad, due to insufficient rainfall. If the sowing area fails to recover in the upcoming days, it will continue to impact market sentiments. Therefore, the monsoon will play a crucial role in determining trade sentiments in the coming days.

As per official release, India has imported a total 1,38,272 MT of pulses including 38,288 MT Tur, 31,625 MT Urad,

As per official release, India has imported 240 MT of Chana during the month of May 2023 as compared to nil in May 2022. All the quantity has been imported alone from Myanmar.

As per official release, India has imported 5,610 MT of Kabuli Chana during the month of May 2023 as compared to 312 MT in May 2022. Sudan remained source of import.

As per official release, India has exported a total 41,231 MT of pulses including 1,777 MT Tur, 3,608 MT Urad, 16,220 MT Masur, 2,879 MT Bengal Gram and 16,113 Kabuli in May 2023.

Chana

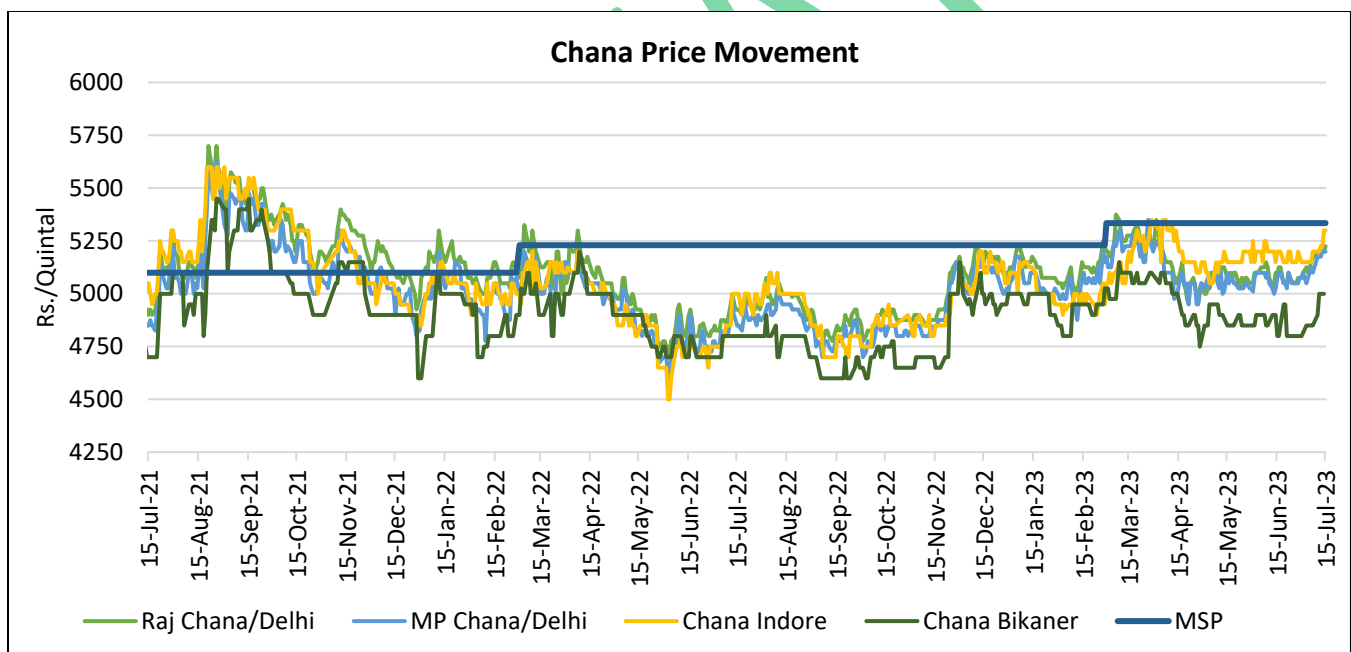

Current Scenario:

Chana witnessed a further increase of 1-3% on average across major benchmark markets such as Bikaner, Indore, and Delhi. This rise can be attributed to the seasonal demand picking up and an improved buying interest from traders, stockists, and millers. Traders believe that the demand season has commenced and will continue until mid-December. Despite the substantial stock and the release of old stock by NAFED (National Agricultural Cooperative Marketing Federation of India), a significant and sudden drop in prices from their current lower levels is not expected at the moment. However, the market may experience a range-bound movement with a slightly positive outlook going forward. Prices are likely to fluctuate within a range of +/- INR 100-200 per quintal in the coming days.

Chana traded at INR 5000 per quintal, up by 3% in Bikaner and at INR 5200 per quintal, up by 0.48% in Delhi. Prices remained up by 1.92% at INR 5300 per quintal in Indore.

Outlook for the week: Chana is expected to trade in a range of INR 100-200 per quintal with firm tone during the week.

Following graph illustrates Chana price movement in different markets:

Chana Prices (Rs. /Quintal)					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	14-07-2023	07-07-2023	13-06-2023	14-07-2022	07-07-2023
