Castor Domestic Market Fundamentals:

- Higher tone were seen in the castor physical market on account of improved in demand. Crushers bought their daily needful castor seed further for crushing. Stockiest and millers are active in the market. Stockiest and millers are active to buy raw material. On the other hand, farmers are not interested to release their holding stocks at the current market prices. They are waiting for Rs. 4250/100 kg. Castor seed futures prices are trading in premium compared to spot market prices, which influenced traders to increase buying activities for the purpose of inventory. In the long run, prices may go up in the long term as lower production estimates of this season.
- India exported castor meal higher at 30312 tonnes in February 2017 than 5263 tonnes in January 2017. However, Castor meal exports volume is expected to go down in upcoming month on lower demand majorly in international markets. Average castor meal exports (April 2016 to February 2017) is registered higher at 414311 T against 367979 T in previous year during the same period of time. FOB quotes for meal stood down by 12.30% to\$57/T in February 2017 against \$65/T during the corresponding period of last year. South Korea bought 333576 tonne meal during April- February 2017.
- According to the Solvent Extractors' Association of India (SEA), Castor seed production in 2016/17 is expected to stand down by 19% to 11.3 lakh tonnes compared to 14 lakh tonnes in previous year. While, castor seed production for 2016/17 is placed down at 17.38 lakh tonnes against previous year record i.e. 17.52 lakh tonne as per the second advance estimates by the ministry of agriculture department.
- Castor oil export of India decreased by 3.44 percent to 34380 MT during December-2016/17 season against 35608 MT in 2015/16 season in the same period of time. Total coffee exports of 2016/17 so far is registered down by 30.39% to 378146 as compared to 543274 MT in the same period of time in last year. Export pace is expected to go down as availability of oil is higher and slow buying activities in international market. India exported castor oil at Rs.272.74 crore per tonne in December-2016, down by 4.22% from previous month record. Total FoB quote of this season 2016/17 stood at Rs. 2652.70 crore compared to Rs. 4198.19 crore in previous season.
- As per recent second advanced estimates of Haryana agriculture department, caster seed crop production, Area and Yield for the season 2016/17 are estimated at 1.3(000 Tonnes), 1 (000 hect.) and 1267(kgs./ hect.).
- This year preliminary Agriwatch estimate for 2017/18 shows 10. 67 lakh tonne production based on farmers feedback and initial field survey in Gujarat, Rajasthan and AP. Area in Gujarat is likely to decline by over 20 % from 6.20 to 4.96 lakh ha. Overall decline in Rajasthan may be 5% and area would decline from 2.30 to 1.84 lakh ha. In AP /Telangana it may decline by 20 percent to 1.06 lakh ha. As weather remains favorable Agriwatch expects normal yield this year. Based on normal yield seed production may decline to 10.67 lakh tonne given the normal weather condition. Agriwatch would revise preliminary estimate in November-2017.

<u>Outlook & Recommendation:</u> - Overall market sentiment is likely to move in steady to higher zone in the short to medium term. Agriwatch expects steady to uptrend in upcoming weeks due to improved local demand.

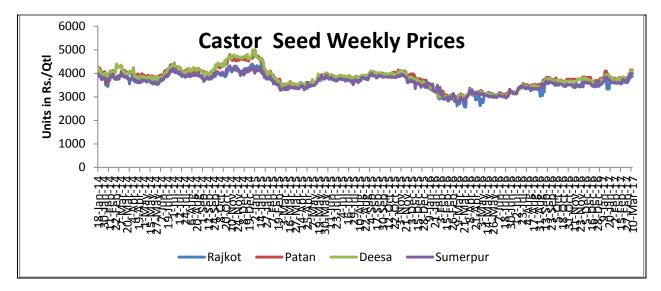

Stake holders in cash market may opt for buying seed around Rs 3920 to 3950 Rs. for stock purpose.

Technical Analysis:

AGRIWATCH

Castor Seed- Balance Sheet For 2017/18

Agriwatch estimates for 2016/17 is remain same. Production shows around 14.42 percent lower side this year against 2015/16 season due to crop shifting from castor seed to other lucrative crops. Over all area would decline from 11.18(normal) to 9.90 lakh ha this year. The estimate is based on initial ground level survey and feedback received from farmers. Agriwatch expects above normal rainfall this year and hopes normal yield too. Based on normal yield realization seed production would decline from 15.12 to 12.69 lakh tonne this year.

The season started with 5.91 lakh tonne as carryout. Thus total availability for current MY comes to 18.6 lakh tonne if estimated production of 12.69 lakh tonne is included. Lower production would drag carryout down from 5.91 to 5.35 lakh tonne. It would push seed price up in second and third quarter.

Outlook & Recommendation:

Castor seed market is likely to go up the second week of March 2017 as demand is going to remain up. Millers and crushers are likely to be active in the market. Arrival pressures and improved oil demand will support coffee prices hike further.

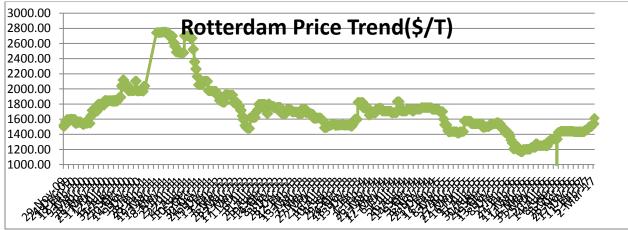

CASTOR SEED & OIL WEEKLY REPORT 6th March, 2017

International market update:

There is no change in Global Castor Seed supply –demand side. Production is expected to decrease from 18.37 lakh tonne to 15.84 lakh tonne in 2016-17 due to lower crop size expected in India this year. Total availability for seed would decrease to 20 lakh tonne including Indian carryout stock of 5.91 lakh tonne. Normal demand for oil and decreasing seed stock in India would continue to push seed price up in India. India dominates global market in seed production with 90 percent contribution. The given diagram shows production contribution of various countries. As production in India is likely to decrease, availability for seed would contract in the third quarter of the year.

Rotterdam Price:- Castor oil Rotterdam Price quoted higher tone from previous week to the second week of March 2017. It stood as \$1613.30 per tonne. It is likely to trade upside in upcoming days.

Source: Agriwatch

Outlook:

Demand from global market is likely to go down in the short term as major buyers like China, EU and USA have covered their immediate needs for second quarter taking advantage of lower price which may affect price momentum. They are in a position to bargain now. However, depleting seed stock and fear of lower area coverage this year due to better prospects of rains can push seed price up in the second half of the year. It may encourage seed and oil price in domestic market in the long term. For short term, prices are expected to be move in the range bound to down zone due to low demand and higher arrivals pace.
