Cotton-Daily-Fundamental-Report

Domestic Fundamentals:

Market Outlook: Cotton market noticed steady to mixed tone in domestic market on Monday.

Prices of cotton moving range bound amid indecision prevailing in the market.

Arrival stood lower at 186000 bales today compared to 191000 bales on Saturday.

In The News: India has imported 2 million bales of cotton (of 170 kgs each) till now during the current season (Oct'13-Sep'14), though total imports expected for this season was 1.2 million, as targeted by Cotton Advisory Board (CAB). Mills, particularly from southern India are finding its competitive to source cotton from overseas than from domestic market as the transportation expenses are very high when they buy the produce any of the western region of the country. Availability of 90-180 days credit facility also persuading millers to buy from other nation. It should be noted that most of the supplies are coming from African regions.

India has become one of the top GM crop growers all around world. Plantation of BT cotton, the only approved GM crop for cultivation in India, has made nation the fourth largest genetically modified crop grower in the world. It should be noted that area under cultivation BT cotton stood 11 million hectares, where as total area under cotton cultivation this season stood 11.4 million hectares, according to Ministry of Agriculture. Currently USA has largest area under GM crops followed by Brazil, Argentina and India.

India is noticing demand for cotton from overseas markets majorly from China due to its superior quality. Corser cotton particularly is in demand.

Weather has improved in most of the cotton growing region, leading to harvesting and so the arrivals.

Area under the cotton cultivation, according to ministry of agriculture stood 114.67 lakh hectares this season (2013-14), compared to 117.29 lakh hectares last season.

Production as per the estimates of Department of Agriculture and cooperation (DAC) would be around 353 lakh bales (of 170 kg each), compared to 340 lakh bales last year.

Yield of cotton though initially gained significantly, but it is likely to decline during the consequences in later stages.

Export according to USDA estimates, are likely to be around 96.05 lakh bales this season (2013-14), versus 101.43 last season.

Import as per the USDA estimates, would be around 14.05 lakh bales this season, compared to 14.59 lakh bales previous season.

International Fundamentals:

- World cotton export would be on lower side as China is about to offload the existing inventories and not intended to import; besides it has restricted the import by imposing import quotas.
- **World production**, according to the USDA february'14 estimates, is likely to be around 25.402 million tones during this season (2013-14), whereas it was 26.796 million tones previous season.

Outlook

We expect domestic prices to remain sideways to weak, as demand is expected to be sluggish.
