AW AGRIWATCH

Cotton-Daily-Fundamental-Report

06th March, 2014

Domestic Fundamentals:

Market Outlook: Cotton market noticed mostly firm tone on Wednesday.

Prices of cotton are ruling slightly upward on recent export enquiries reported in the market.

Arrival stood lower at 164000 bales today compared to 172000 bales on Tuesday.

In The News: Arrival of cotton in India has been increased by 12.87% on Y-oY basis to 24.55 million bales of 170 kgs. each till 28 February 2014. During the corresponding period last year the same stood 21.75 million bales.

Export subsidies for textile sector are about to vanish as Indian textile sector has became globally competitive. As per the WTO law, a product is called competitive if it acquires 3.25% share in world market for two consecutive years and a competitive product is not eligible to get export subsidy. Currently India posse 3.5% shares in global market and hence it should not be given any export incentives.

India has imported 2 million bales of cotton (of 170 kgs each) till now during the current season (Oct'13-Sep'14), though total imports expected for this season was 1.2 million, as targeted by Cotton Advisory Board (CAB).

Area under the cotton cultivation, according to ministry of agriculture stood 114.67 lakh hectares this season (2013-14), compared to 117.29 lakh hectares last season.

Production as per the estimates of Department of Agriculture and cooperation (DAC) would be around 353 lakh bales (of 170 kg each), compared to 340 lakh bales last year.

Yield of cotton though initially gained significantly, but it is likely to decline during the consequences in later stages.

Export according to USDA estimates, are likely to be around 96.05 lakh bales this season (2013-14), versus 101.43 last season.

Import as per the USDA estimates, would be around 14.05 lakh bales this season, compared to 14.59 lakh bales previous season.

International Fundamentals:

- Africa is finding scope to sell their cotton in India. A delegation of 18 members from Africa is visiting Coimbatore and other cotton hubs in India. International Cotton Trade, an alliance of World Trade Organization (WTO) and United Nations (UN), is initiating a mission to make access for African cotton in Indian market.
- USDA projects cotton prices to decline by 10.5% decline in average prices to 68 cents per pound during the current marketing year. The projected price is level to five year low, and is below the average cost of production, 70 cents per pound.
- Federal Committee on Cotton (FCC) of Pakistan estimated the production target of cotton for season 2014-15 at 15.1 million bales (of 170 kgs each), whereas for the season 2013-14 it was estimated at 14.1 million bales.

Outlook

We expect domestic prices to remain firm amid export demand reported in the market.
