

Domestic Fundamentals:

Market Outlook: Cotton market noticed mostly weak tone on Wednesday. Arrival stood lower today at 72,000 bales compared to 74,000 bales on Tuesday.

In The News: According to the traders and market participants cotton acreage is likely to increase by 10-15%, specially in north India in the upcoming season as cotton fetched better prices than others alternatives like Guar.

Export of cotton yarn from India is expected to be around 1,350 million kg. in 2013-14, according to Cotton Textile Export Promotion Council (Texprocil). On the announcement of Chinese cotton policy, domestic mills shown their concerns over the export of the cotton yarn as China is the major importer of the cotton yarn, But due to its quality and price competitiveness, Indian cotton yarn in China is getting attention of the buyers and hence likely to have good export prospects.

India is expected to become largest producer of cotton by 2022, says "The Agricultural Outlook, 2013-2022". As per this recently release report, production of cotton in China is likely to decline by 17% whereas India will increase its production by 25%. The report mentioned above is collaborative effort of Organization of Economic Co-operation and Development (OECD) and Food and Agriculture Organization (FAO) of United Nations (UN).

According to the third advance estimate released by Ministry of Agriculture, cotton output would be around 36.50 million bales (of 170 kg each) in the current season compared to 34.22 million bales previous season.

Export of cotton yarn from India is expected to be around 1,350 million kg valued USD 4.70 billion, for the financial year 2014. During the Initial 10 months alone i.e. April to January, India has exported around 1,082 million kg of cotton yarn valued USD 3.75 billion.

International Fundamentals:

As per the latest report released by USDA, 62% of the sowing has been completed in USA as on May 25. The five year average is though 64%, a little higher than the current figure. Among the fifteen major states, Arizona, Arkansas California, Louisiana and Missouri have completed more than 90% of their plantation. Mississippi North Carolina, South Carolina, Tennessee and Virginia have completed their 70% of their sowing. Sowing in Texas reached the level of 49%, five percent below the five year average

Sowing of cotton in Uzbekistan has been completed, despite the late start due to favorable weather conditions. Germination has been reported in many areas, whereas few areas require replanting.

Production of cotton in China is likely to be around 6.44 million tons, 23000 tons higher, which was projected earlier, as reported by Beijing Cotton Outlook (BCO) in its latest release. China cotton ending stock in 2014-15 is expected to be around 13.42 million tons compared to 13.13 million tons estimated earlier.
