

# **Domestic Fundamentals:**

Market Outlook: Cotton market noticed mixed tone on Monday.

Arrival stood unchanged at 42,500 bales today compared to 42,500 bales yesterday.

**In The News:** According to Ministry of Agriculture, Kharif sowing area has crossed 95 lakh hectares as reported on 20 June, 2014. The planting of cotton is in progress, around 20 lakh hectares of cotton has been planted all over India.

Delayed monsoon and lower arrival has boosted the cotton prices in most of the markets. Currently good demand is being noticed in the market and supply is lagging due to season ending.

Cotton output in India estimated higher at 388.25 lakh bales (of 170 kg each) for season 2013-14, said Cotton Association of India (CAI). Maharashtra is reported with output of 79.25 lakh bales in the current season compared to 72.50 in previous season whereas production in Gujarat stood 120.80 lakh bales in 2013-14 against 83.30 lakh bales in previous season. What causes the cotton production to increase in India is the boosted yield derived by the favorable weather condition and BT cotton.

Cotton acreage in India, the second largest grower in the world, could surge for the first time after 2011, on expectation of higher returns. According to the market participants, cotton area is likely to expand to 12 million hectares in the coming season, noticing a growth of 3.4% compared to the previous year. Global prices which reached a two year high in March are encouraging farmers and other stakeholders to prefer cotton over the other crops. Expectation of El Nino is also a reason farmers are willing to plant cotton instead of other crops which requires more water than fiber crop.

MSP of Kharif crop 2014-15, including cotton would be announced on June 15. A moderate hike of Rs. 50 per quintal in MSP of cotton is reportedly suggested by Agriculture Commission.

#### **International Fundamentals:**

Tanzania farmers and stakeholders, along with Tanzania Cotton Growers Association (TACOGA), Tanzania Cotton Association (TCA) and Tanzania Cotton Board (TCB) have set the cotton MSP at TSH 750 (USD 0.446)/kg for new marketing season beginning June 18, 2014.

New cotton season (2014-15) has been started in Pakistan, where some raw cotton is being sourced to ginning factories in Punjab. According to the ginners, factories are likely to start operation during the week to start supply of new cotton crop to textile mills.

According to the latest survey report released by China Cotton Association (CCA), planting area of cotton in the country is expected to fall by 12.6 percent on year on year basis to 4.08 million hectares in 2014.

Cotton imports to China fell by 14.6% to 191,500 metric tons in May compared to April this year. China is likely to end its cotton stockpiling policy and hence importing less.
