

Domestic Fundamentals:

Market Outlook: Cotton market noticed mixed sentiments.

In The News:

NAFED issue tender to sell the 4800 bales of FP cotton crop year 2012-13) from its various warehouse in Andhra Pradesh. The sell tender of the Lint cotton (loose) from various godowns also issued.

According to Cotton Association of India, cotton production in India would be around 395 lakh bales in 2013-14 compared to 356.75 lakh bales in 2012-13.

The new government has approved field trials for 21 new varieties of Genetically Modified (GM) crop including cotton, maize, rice and wheat. It is believed that this move would help to boost the yield of crops and stabilizing food prices. Over the concerns of health hazards, the issue is highly controversial in India and so far allowed only BT cotton to be grown commercially.

According to Ministry of Agriculture, around 45.20 lakh hectare of area has been sown for cotton this year as on July 11, around 51.10% lower than the previous year which was 92.44 lakh hectares during the same period.

Following the weak International market and weak overseas demand, prices of cotton are moving southwards in domestic market. Although global production is likely to decline in coming season, on lower import to China supply would lead consumption, which is expected to increase marginally.

Union Budget: Loading/unloading and transportation of cotton exempted from service tax. Union finance minister, Arun Jaitley, in his maiden budget, has proposed setting up of new textile mega clusters in five states. The mega clusters will be set up at Surat and Kutch in Gujarat, Bareilly and Lucknow in Uttar Pradesh, Bhagalpur in Bihar, Mysore in Karnataka and one in Tamil Nadu. A sum of Rs. 200 crores has been allocated for setting up these textile mega clusters.

Cotton yarn export started to see decline during the current financial year. Cotton yarn export registration fell to 99.92 million kilograms compared to 115.96 million kilograms during the same period last year.

The Union Government has announced MSP of Kharif crops (season 2014-15), including cotton on June 25. The MSP of cotton has been raised to Rs. 3750 per quintal for medium staple and Rs. 4000 for long staple, which were Rs. 3700 and Rs. 4050 respectively last year.

International Fundamentals:

According to the latest report released by USDA, as on July 15, 2014, 53% of cotton crop in USA is in excellent to good condition compared to 55% a week ago and 42% a year ago. 70 % squaring has reported in cotton which was 53% last week and 66% a year ago.

Cotton futures fell to a two-year low on July 10. The December cotton contract on ICE futures settled at 68.55 cents a pound on Thursday, 1.12 cents or 1.6% lower from the previous day after touching the two year low of 68.50 cents per pound. It is expected that supply would be on higher side in USA, the largest exporter of cotton, due to prospect production in the country and falling import demand from China, the largest importer of cotton.

Lower imports to China and higher ending stocks outside China will lead to the southwards movement in the international prices in 2014/15. Also, world production is expected to lead consumption in 2014/15.

Outlook

We expect domestic prices to remain weak to steady in near term.
