

Domestic Fundamentals:

Market Outlook: Cotton cash market noticed steady tone on Thursday. However, profit-booking witnessed in future market.

In The News: Cyclone Nilofar is likely to affect the cotton and groundnut farmers in the coastal regions of Gujarat. The standing crop of cotton and groundnut in parts of Saurashtra, Kutch and North Gujarat could be adversely hit by the unseasonal rains. However, the first plucking has almost been completed in most regions, but for the long-duration plants, subsequent plucking may be affected.

The cotton corporation of India (CCI) has started the procurement of cotton in the major markets of Karnataka, Telangana, Andhra Pradesh and Maharashtra as prices of the crop are falling below the minimum support prices (MSP). Around 17000 bales of cotton have been procured by CCI so far, which is majorily contributed by Telangana and Andhra Pradesh.

Export of cotton from the country is picking pace on the commencement of the crop season but despite the expectation of higher production this year, exports of the fiber is likely to remain weak during the current season 2014-15. Cotton Advisory Board (CAB) has anticipated exports of 9 million bales this season, 23% lower from the previous year export, which were 11.7 million bales. According to various analyst though, cotton exports would be around 7-7.5 million bales, fairly lower than the CAB estimates.

Amid higher production in the country and the region, farmers in Vidarbha are facing trouble as prices are falling downwards due to the leading supplies. Prices are breaching the level of Rs. 4000 per quintal which is average minimum support price (MSP). Also National Agricultural Cooperative Marketing Federation of India Limited (NAFED), who has affiliated Maharashtra State Federation to procure cotton, has proposed that, no farmer should be allowed to sell more than 25 quintals in a day at MSP and purchase by federation at MSP should not exceed 25% of the output in its area of operation. This proposal has further added worries to the farmers.

India exports of Textile and Apparel to USA has surged by 7% during January-August 2014, according to US Department of Commerce's Office of Textiles and Apparel (OTEXA) data. The same has noticed the annual growth of 2% in last five year. India has exported textile and apparel to USA valued USD 4.54 billion in August this year compared to USD 4.26 billion previous year during the same period.

According to the latest report of USDA, countries could face fall in the export of cotton and its products including yarn and textiles due to lack of price competitiveness if they support the policies that support prices above the world market.

According to latest weekly update by International Cotton Advisory Committee (ICAC), cotton production in India would stand around 6.56 million tonnnes in the current season (Oct'14-Sep'15) compared to 6.634 million tonnnes in the previous season.

As per the latest estimates released by Ministry of Agriculture (MoA), around 126.55 lakh hectare of area has been sown under cotton this year as on October 10, around 10.64% higher than the previous year, when it was 114.37 lakh hectares during the same period.

Cotton production in India during the current season (Oct'14-Sep'15), would to be around 400 lakh bales (of 170 kgs. each), as estimated by consultative committee of the Cotton Advisory Board (CAB). According to the latest estimates of Agriwatch, output of cotton in the country would stand around 395 lakh bales compared to 366 lakh bales in previous season.

YSR congress party (YSRCP) has requested centre and Telangana Government to raise the cotton MSP to Rs. 5,500 per quintal and urged to procure cotton through Cotton Corporation of India (CCI) or the government authorised agencies in order to eliminate middle man margins.

International Fundamentals:

According to the latest report released by USDA, as on October 26, 2014, 48% of cotton crop in USA is in excellent to good condition, which was 47% last week and 44% a year ago. 91% bolls open has reported in cotton which was 86% last week and 95% as five year average. 42% of cotton harvesting reported which was 29% a week ago and 41% as a 5 year average.

Uzbekistan has finished the cotton harvest campaign. The farmers of the country have harvested 3.4 million tonnes of cotton this year. It has been reported that 90% of the harvested crop is of high grade.

China imported around 122,900 tonnes of cotton in September this year, 39% lower when compared to same month last year, reported China Cotton Association (CCA). During the initial nine month of the year, China imported 2 million tonnes of cotton, 38% lower when compared to same period last year.

According to the latest report released by USDA, as on October 19, 2014, 47% of cotton crop in USA is in excellent to good condition, which was 47% last week and 44% a year ago. 86% bolls open has reported in cotton which was 77% last week and 90% as five year average. 29% of cotton harvesting reported which was 22% a week ago and 31% as a 5 year average.
