

#### **Domestic Fundamentals:**

**Market Outlook**: Cotton market noticed mixed tone on Tuesday. Most of the market remained closed following "Moharram".

**In The News**: No loss is expected in cotton output in Andhra Pradesh and Gujarat due to cyclones Hudhud and Nilofar, said Cotton Corporation of India (CCI).cotton procurement has been started in Andhra Pradesh and Telangana at MSP by CCI. Maharashtra Cotton State Federation said it will start procurement operation from December 1 to December 15 as late arrivals are expected in the state due to the delayed rains.

Garments export from India during FY April-September 2014-15 has noticed growth of 17.6% when compared to previous FY for the same period, reported Apparel Export Promotion Council (APEC). Amplifying labour cost in China, appreciation in currency, volatile settlement of factories in Bangladesh and higher rate of inflation has created the massive opportunities for India in this sector.

Cotton Corporation of India (CCI) has started the procurement of cotton in Andhra Pradesh and Telangana at MSP, as the local prices in these markets are being quoted lower than MSP. According to the officials of CCI, around 15,000 bales of cotton have been procured in the last week. The MSP of long staple cotton is Rs. 4050 per quintal, but Rs. 3,800-3,900 a quintal were quoted for the same variety in these markets.

Export of cotton from the country is picking pace on the commencement of the crop season but despite the expectation of higher production this year, exports of the fiber is likely to remain weak during the current season 2014-15. Cotton Advisory Board (CAB) has anticipated exports of 9 million bales this season, 23% lower from the previous year export, which were 11.7 million bales. According to various analyst though, cotton exports would be around 7-7.5 million bales, fairly lower than the CAB estimates.

Amid higher production in the country and the region, farmers in Vidarbha are facing trouble as prices are falling downwards due to the leading supplies. Prices are breaching the level of Rs. 4000 per quintal which is average minimum support price (MSP). Also National Agricultural Cooperative Marketing Federation of India Limited (NAFED), who has affiliated Maharashtra State Federation to procure cotton, has proposed that, no farmer should be allowed to sell more than 25 quintals in a day at MSP and purchase by federation at MSP should not exceed 25% of the output in its area of operation. This proposal has further added worries to the farmers.

India exports of Textile and Apparel to USA has surged by 7% during January-August 2014, according to US Department of Commerce's Office of Textiles and Apparel (OTEXA) data. The same has noticed the annual growth of 2% in last five year. India has exported textile and apparel to USA valued USD 4.54 billion in August this year compared to USD 4.26 billion previous year during the same period.

According to the latest report of USDA, countries could face fall in the export of cotton and its products including yarn and textiles due to lack of price competitiveness if they support the policies that support prices above the world market.

According to latest weekly update by International Cotton Advisory Committee (ICAC), cotton production in India would stand around 6.56 million tonnnes in the current season (Oct'14-Sep'15) compared to 6.634 million tonnnes in the previous season.

As per the latest estimates released by Ministry of Agriculture (MoA), around 126.55 lakh hectare of area has been sown under cotton this year as on October 10, around 10.64% higher than the previous year, when it was 114.37 lakh hectares during the same period.

#### **International Fundamentals:**

The largest importer of US upland cotton, Turkey has announced the investigation against possible dumping of US cotton in the country. This is the third dispute over US cotton in recent years and that could lead to instability in trade on global front. Turkey imported around 1.1 million bales of upland cotton from USA, costing around USD 500 million.

World production would stand around 26.24 million tonnes this year (Aug'14-Jul'15) compared to 25.981 million tonnes a year ago, said International cotton advisory committee (ICAC) in its latest report.

According to the latest report released by USDA, as on October 26, 2014, 48% of cotton crop in USA is in excellent to good condition, which was 47% last week and 44% a year ago. 91% bolls open has reported in cotton which was 86% last week and 95% as five year average. 42% of cotton harvesting reported which was 29% a week ago and 41% as a 5 year average.

Uzbekistan has finished the cotton harvest campaign. The farmers of the country have harvested 3.4 million tonnes of cotton this year. It has been reported that 90% of the harvested crop is of high grade.
