

## **Domestic Fundamentals:**

Market Outlook: Cotton market noticed mixed tone on Saturday.

**In The News**: The Trading Corporation of Pakistan (TCP) is likely to start its procurement operations of cotton from next week. TCP procurement rates fixed at Rs6,864 per maund may help ginners get better price for cotton

Cotton Corporation of India (CCI) is likely to start purchasing soon from Gujarat.

On the worrisome condition of farmers in Vidarbha, a congress delegation met Chief minister Devender Fadnavis and requested the state government to start the process of procurement in the region and pay higher minimum support price (MSP) in order to relief farmers from the crisis. It should be noted that the six more farmers have ended their lives in Vidarbha region in last two days on fears of crop loss.

The agriculture minister of Haryana, O P Dhankar, said that affected farmer will be compensated for the crop loss, if the field study proves the damage in the crop. He also said that the new BJP government formed in the state is dedicated to ensure genuine prices to the farmers for their produce including the paddy and cotton.

Cotton yield is expected to fall drastically in Nizamabad district of Andhra Pradesh due to pest attack in the crop which has led to withered cotton bolls. Around 3.33 lakh hectares was sown for cotton in Nizamabad district and only 30-40% yield is expected in the Kharif cotton.

Telangana farmers are complaining about the delayed set up of procurement center by Cotton Corporation of India (CCI) in the state. According to District General Secretary of Khammam, only one procurement center has been established in the district against the requirement of twelve.

Garments export from India during FY April-September 2014-15 has noticed growth of 17.6% when compared to previous FY for the same period, reported Apparel Export Promotion Council (APEC). Amplifying labour cost in China, appreciation in currency, volatile settlement of factories in Bangladesh and higher rate of inflation has created the massive opportunities for India in this sector.

Export of cotton from the country is picking pace on the commencement of the crop season but despite the expectation of higher production this year, exports of the fiber is likely to remain weak during the current season 2014-15. Cotton Advisory Board (CAB) has anticipated exports of 9 million bales this season, 23% lower from the previous year export, which were 11.7 million bales. According to various analyst though, cotton exports would be around 7-7.5 million bales, fairly lower than the CAB estimates.

Amid higher production in the country and the region, farmers in Vidarbha are facing trouble as prices are falling downwards due to the leading supplies. Prices are breaching the level of Rs. 4000 per quintal which is average minimum support price (MSP). Also National Agricultural Cooperative Marketing Federation of India Limited (NAFED), who has affiliated Maharashtra State Federation to procure cotton, has proposed that, no farmer should be allowed to sell more than 25 quintals in a day at MSP and purchase by federation at MSP should not exceed 25% of the output in its area of operation. This proposal has further added worries to the farmers.

India exports of Textile and Apparel to USA has surged by 7% during January-August 2014, according to US Department of Commerce's Office of Textiles and Apparel (OTEXA) data. The same has noticed the annual

growth of 2% in last five year. India has exported textile and apparel to USA valued USD 4.54 billion in August this year compared to USD 4.26 billion previous year during the same period.

#### **International Fundamentals:**

Brazil monthly cotton export stood 148,500 tonnes in October 2014, the highest monthly volume recorded in last two years. The same could lift the estimated export volume for the year 2014, which is 660,000 tonnes forecasted by Conab.

China has announced that it will pay subsidy of Yuan 2000 (USD 330) to the farmers on per tonnes of cotton harvested outside the top producing region, Xinjiang.

According to the latest report released by USDA, as on November 02, 2014, 48% of cotton crop in USA is in excellent to good condition, which was same last week and 43% a year ago. 95% bolls open has reported in cotton which was 91% last week and 97% as five year average. 50% of cotton harvesting reported which was 42% a week ago and 51% as a 5 year average.

The largest importer of US upland cotton, Turkey has announced the investigation against possible dumping of US cotton in the country. This is the third dispute over US cotton in recent years and that could lead to instability in trade on global front. Turkey imported around 1.1 million bales of upland cotton from USA, costing around USD 500 million.

#### **Outlook**

### We expect domestic prices to remain weak to range bound in near term.
